How Rose Valente Achieved Fortune.

An Interesting Story of How a Young Woman Succeeded in Business--A Chance for Others to do so too

A young lady of Medina, N.Y., is being envied by all her friends. She is Miss Rose Valente of 142 Center street. A reporter to-day asked her for the facts. She modestly refused to discuss the matter, and simply handed him the following letter which she wrote to a prominent educator and which fully explains her story:

"I write you this letter as a statement of my success after taking your instruction in book-keeping and to inform you how pleased I am with the position you secured for me.

"When I first wrote to you I had no idea that book-keeping could be learned so thoroughly and so easily by correspondence. My friends laughed at the idea, and I had always thought it necessary to attend a business college to learn bookkeeping, but such is positively not the case. I devoted from one-half hour to an hour to the study each evening, and in three weeks' time I had a much better knowledge of bookkeeping than the average student who attends a business college during the same period. I know this to be true because I questioned a young man who was taking a course in a first-class business college, and he did not begin to have the practical information I had.

"As soon as I finished the course I accepted a position that you gave me. I went to work with a great deal of nervousness. After the first day this passed away because I quickly found out that the practical hints which you taught me enabled me to take hold at once, and by the second week I had charge of a set of books which would stagger many experienced bookkeepers. The fact that my employer has raised my salary twice within the past three months is the best proof that my work has been satisfactory.

"I advise anyone who anticipates taking a course in bookkeeping to take your course. It would be impossible for anyone to attend a business college and get the same attention that you give your students. I have earned that if one attends a business college he is filled

full of a lot of fancy theories that amount to nothing when he begins practical work. Your course covers the entire field. When I accepted this position I seemed to have just exactly the knowledge I required.

"The advantage in taking a course by correspondence is that when you wish to refer to it you always have it handy, while in taking a personal course you must depend upon memory. During the first few days I was compelled to refer to the course. After I did this a few times I had no trouble.

"I enclose an express money order to pay my tuition. Your offer is certainly a fair one. I should like to know the business college that will allow its students to pay their tuition after the college places them in a position. They do not do this. You must pardon me if I appear too enthusiastic, but several of my friends treated this matter as a joke when I decided to take it up, and the joke is now on them. Had I gone to a business college I would not be through yet, and would have spent a great deal. As it now stands, I have a nice position, and did not have to pay a cent for instruction until you placed me in a position. Again thanking you for what you have done for me, I am very gratefully yours, *Rose R. Valente.*" Our free book, "How to Succeed in Business," started Miss Valente on the road to success. It tells you how you can learn bookkeeping and pay your tuition after we place you in a position. It tells you about the most wonderful system of accounting ever discovered.

It contains information that, more than anything else, will help you succeed in life. We have a limited number of these books that will be sent absolutely free to ambitious persons who sincerely desire to better their position and add to their income. Send us your name and address on a postal card to-day and receive the book by return post. Address COMMERCIAL CORRESPONDENCE SCHOOLS, 125 E Schools Buildings, Rochester, N. Y.

A Whole Garden Full of Choice Flowers

With Park's Floral Magazine One Year,

ONLY 15 CENTS.

Order To-day. Tell Your Friends.

 The Magazine comes monthly and teems with floral information. Its reading insures success.

Premium No. 1—14 Pkts. Choice Flower Seeds.

Aster, Double, all the fine colors in splendid mixture.
Alyssum, New Carpet, trailing; a carpet of white.
Candytuft, choice old and new; splendid mixed.
Corcomb, Dwarf, all colors, choicest seeds.
Daisy, Double, large-flowered, all colors, 1st quality seeds.
Maurandia, a charming trellis vine, 8 sorts.
Mignonette, New Giant Red, very sweet, fine.
Pansy, Giant Fragrant, 20 fine sorts mixed.
Petunia, New Striped Bedding; makes a glorious bed.
Pink, New Japan, very rich; double and single mixed.
Poppy, French, superb double, 15 sorts mixed.
Snaptargon, Calceolaria-flowered, new; superb colors.
Zinnia, Pumila, very double, beautiful, all colors.
Mixed Seeds, 1,000 sorts; yields new blooms daily.

Premium No. 2—10 Pkts. Choice Garden Seeds.

BET, Crimson Globe, new, fine. **ONION**, Australian Brown, good.
CABBAGE, New Early Spring. **PARSNIP**, Improved Guernsey, fine.
CABBAGE, Danish Ball Head, late. **RADISH**, Cardinal White-tip, early.
CORN, Sweet, Country Gentleman. **TOMATO**, Improved Stone, best.
LETTUCE, New York, superb sort. **TURNIP**, Improved Purple-top, fine.

Premium No. 3—10 Choice Flowering Bulbs.

Allium Neapolitanum, large clusters of fine white bloom.
Anemone coronaria, large, lovely Poppy-like flowers.
Anomatheca cruenta, Scarlet Freesia; very handsome.
Alstromeria, showy, elegant Lily-like orange flowers.
Hyacinthus, giant white summer Hyacinth; 2 feet.
Gladiolus, early-flowering; spikes of showy flowers.
Montbretia, very pretty, small Gladiolus-like flowers.
Oxalis rosea, for baskets; rosy clusters; splendid.
Ranunculus, French, superb large double flower.
Sacifraga granulata, exquisite double white flowers.
 Pot these bulbs now, or bed out in spring. They are beautiful in either window or garden.

 One premium collection, with cultural directions, and Magazine a year, only 15 cents; or the three collections with Magazine a year 35 cents. Order now. Park's Floral Guide, richly illustrated and teeming with floral information, sent with every package, or to prospective buyers who apply for it.

GET UP A CLUB.

Any one of the following sent for a club of two, or all for a club of twelve:

ASTER, Rose-flowered, large double. **PANSY**, New English-faced, large.
CHEYSANTHEMUM, single, double. **POPPY**, New Dwarf Peony-flow'rd.
CARNATION, Margaret, double, fine. **SCHIZANTHUS**, Butterfly Flower.
DAMIELA, finest single, mixed. **STOCK**, Double German Ten Weeks.
LOBELIA, New Perpetual-flowering. **SWEET PEA**, large-flowered, mixed.
NASTURTIUM, climbing, fragrant. **VERBENA**, choice hybrids, mixed.
NICOTIANA, Jasmine-scented, fine. **ZINNIA**, large double, mixed.

I want a club of at least 25 subscribers from every postoffice, and offer money and seeds and bulbs for such a club. As the premiums are liberal, such a club can be obtained by anyone in a few hours. Send for full particulars, blank lists, sample copies and confidential terms. You will be astonished at the liberal offer I will send you. Write at once. Don't delay the work a day.

WATCHES AS PREMIUMS.

For a club of 25 trial subscribers at 15 cents each (\$3.75), I will send to the agent by mail, postpaid, a handsome watch, suitable for a boy, or for the kitchen or bedroom. Retail price, \$1.00. For 35 subscribers (\$5.25), I will mail a stem-wind watch, suitable for a man or for a boy. Retail price, \$2.50. Both these watches are good time-keepers, and will be found reliable.

Star Flower and Malze.

For 15 cents I will send Park's Floral Magazine a year and two packets of seeds—Park's Star Flower and Park's Giant Striped Malze. Everyone who cultivates flowers should read Park's Floral Magazine, and everyone who has a garden should try these grand novelties. You will never regret it if you accept this offer. Order to-day.

Special Note to You. I am anxious to have an agent at every village to take orders for the Magazine and seeds. I offer terms which will insure you very profitable employment. Will YOU not act in that capacity? Please write for agent's terms and outfit. Free. Don't delay. Address

Park's Floral Magazine one year and 10 Choice Flowering Bulbs.

PARK'S FLORAL MAGAZINE is the pioneer floral journal of America. It was established in 1871, and has been continuously published ever since. It has always been entirely floral, and from a small journal of but a few hundred circulation it has grown to its present size, with a circulation of more than 375,000 copies monthly. It is today the most popular floral monthly in the world. **Price, 5 years 45 cents, one year 10 cents.**

What You Get for 15 Cents.

To induce new subscriptions and also encourage a love for flowers I make this offer: **Send me 15 cents before July 1st** and I will mail to you **Park's Floral Magazine** one year and **10 Choice Flowering Bulbs**, as follows:

Allium Neapolitanum, a hardy plant fifteen inches high, bearing large clusters of pretty white flowers. Does well for pots or garden beds.

Anemone coronaria, the lovely Poppy Anemone. The tubers are hardy in sandy, well-drained soil when planted out in spring.

Alstroemeria aurantiaca, a Lily-like plant with handsome orange flowers. Plant eight inches deep in a sunny bed.

Anomatheca cruenta, a hardy plant, a foot high, often called Scarlet Freesia. Plant deep, in sandy soil, in a warm, raised border; or, pot for the house.

Hyacinthus Candicans, a member of the Lily family, often called Giant Hyacinth. It blooms in summer, bearing large, drooping bells on a stalk several feet high; hardy, and beautiful in a group.

Gladiolus, Early-flowering, the rare and beautiful dwarf Gladiolus; flowers mostly orange shade, with bright markings, borne in spikes, as shown in the engraving. Easily grown.

Montbretia, a free-blooming, summer-flowering bulb; flowers bright, in spikes, very showy in clumps; fine for cutting; not common, though of easy culture.

Oxalis rosea, a fine flower for pots or baskets; blooms in clusters in great profusion. One of the flowers that always please.

Ranunculus, French, very showy double flowers, large, of delicate texture, and showing many attractive colors. Should be better known.

Saxifraga granulata, a hardy herbaceous plant, eighteen inches high, with very small, bulbous root. Perfectly hardy, and soon forms a large clump. Flowers double, white, and handsome.

The engravings show the above described flowers but poorly. If you do not have this collection do not fail to get it now, when it may be obtained almost without cost. You will certainly be more than delighted with this premium. Tell your friends, and get up a club. Address

GEO. W. PARK, La Park, Pa.

Park's Booklets.

An illustrated Booklet describing the choice bulbs here offered, also other premiums, will be mailed on application.

Another Booklet tells all about the best Vegetables and how to grow them. Also free.

Park's "All About Primroses", fully illustrated, is just what its name suggests, and should be in the hands of all lovers of Primroses. Free for the asking.

We Shall Buy a Million

Bottles of Liquozone and Give Them to the Sick.

We have purchased for \$100,000 the American rights to Liquozone. We thus control the only way to kill germs in the body and end a germ disease. We want the sick to know this product, and at once. So we make this remarkable offer. We will buy a million 50c bottles and give them to a million sick ones. Will you—if you need it—let us buy one for you?

Costs \$500,000

We publish this offer in every great newspaper in America. The cost of the offer, we expect, will reach \$500,000. We pay that price because it seems the only way to quickly let the sick know what Liquozone does.

The greatest value of Liquozone lies in the fact that it kills germs in the body without killing the tissues, too. And no man knows another way to do it. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Liquozone does in germ troubles what all the drugs, all the skill in the world, cannot do without it. It cures diseases which medicine never cures.

Acts Like Oxygen.

Liquozone is the result of a process which men have spent over twenty years in perfecting. Its virtues are derived solely from gas, made in large part from the best oxygen producers. By a process requiring immense apparatus and 14 days' time, these gases are made part of the liquid product.

The result is a product that does what oxygen does. Oxygen gas, as you know, is the very source of vitality. Liquozone is a vitalizing tonic with which no other known product can compare. But germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetal matter. Yet this wonderful product which no germ can resist, is, to the human body, the most essential element of life.

Germ Diseases

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain.

Liquozone kills the germs, wherever they are, and the results are inevitable. By destroying the cause of the trouble, it invariably ends the disease and forever.

Asthma	Hay Fever—Influenza
Abscess—Anemia	Kidney Diseases
Bronchitis	La Grippe
Blood Poison	Leucorrhœa
Bright's Disease	Liver Troubles
Bowel Troubles	Malaria—Neuralgia
Coughs—Colds	Many Heart Troubles
Consumption	Piles—Pneumonia
Colic—Croup	Pleurisy—Quinsy
Constipation	Rheumatism
Catarrh—Cancer	Skin Diseases
Dysentery—Diarrhea	Scrofula—Syphilis
Dandruff—Dropsy	Stomach Troubles
Dyspepsia	Throat Troubles
Eczema—Erysipelas	Tuberculosis
Fevers—Gall Stones	Tumors—Ulcers
Goitre—Gout	Variococœle
Gonorrhœa—Gleet	Women's Diseases

All diseases that begin with fever—all inflammation—all catarrh—all contagious diseases—all the results of impure or poisonous blood.

In nervous debility Liquozone acts as a vitalizer, accomplishing what no drugs can do.

50c. Bottle Free.

If you need Liquozone, and have never tried it, please send us this coupon. We will then mail you an order on your local druggist for a full size bottle, and we will pay your druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquozone is, and what it can do. In justice to yourself, please accept it to-day, for it places you under no obligations whatever.

Liquozone costs 50c. and \$1.

CUT OUT THIS COUPON

for this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 458—460 Wabash Ave., Chicago.

My disease is.....
I have never tried Liquozone, but if you will supply me a 50c. bottle free I will take it.

M 302 Give full address—write plainly.

Any physician or hospital not yet using Liquozone will be gladly supplied for a test.

PARK'S FLORAL MAGAZINE.

A MONTHLY JOURNAL OF FLORICULTURE.

Vol. XL.

April, 1904.

No. 4.

THE NEW HOHENZOLLERN ASTER.

THE Double Asters have been greatly improved lately by the diligent and skillful efforts of the German florists, and one of the latest and best of the improved races is the Hohenzollern Aster, developed and brought to notice by the noted specialist, Frederick Roemer. The

plants of this grand strain grow luxuriantly to the height of two feet, branching freely, and forming bushy heads, which are a mass of bloom during the late autumn months. The flowers are of prodigious size — the largest of the Aster family, sometimes as much as seven inches in diameter, and with long, linear, twisted petals, as shown in the engraving. The colors are white, rose, crimson, flesh, lilac and azure blue, and the full double flowers are borne on long, strong stems.

For a showy bed upon the lawn, as well as flowers for exhibition at Fairs, this Aster will doubtless stand unrivaled. The seeds are high in price as yet, but the extra cost will not be regretted when the huge flowers develop in autumn. Double Asters all like a rich, rather tenacious clay soil with good drainage, and a sunny situation. A good dressing of stable litter put on during summer is very beneficial.

CUT WORMS AND APHIS.

IN PLANTING seedlings in California one must guard against the cut worm.

The tiny plant will be all right for a day or two, when lo! the next time you look at it all that is left is a stem bereft of the leaf. When seeds are planted in the ground and come up, the same fate awaits them. To

prevent the cut worms' mischief, bran sprinkled with paris green should be laid on the ground about the seedlings. The worms will eat this before they get to the plants, and that finishes them.

Some of the roses grown in California are subject to the green aphis, which attack the tender new growth, and the soft buds. Anyone with a yard here, should be provided with a spray, and should use whale oil soap on the roses. The soap comes in bars. One bar will make

twelve gallons. I shave the soap into a bucket of water and let it boil until it is a thick jelly, when it cools. It is then put in a tub of water and thoroughly mixed. With the spray go over everything that is infested. This preparation is excellent for scale also, and we go over everything in our yard every two weeks.

Georgiana Townsend.

CIRCULATION.—The actual circulation proven when required, is 375,000 copies monthly. No free distribution to promiscuous lists of names. Advertising offices 713-718 Temple Court, New York City, N. Y., The C. E. Ellis Company, Managers, to whom all communications about advertising should be addressed.

SUBSCRIPTION PRICE, 45 cents for five years, prepaid. Trial subscriptions of a year, 10 cents.

THE EDITOR invites correspondence with all who love and cultivate flowers.

APRIL, 1904.

Circulation Bulletin.

Number of copies mailed of Park's Floral Magazine, as indicated by Postoffice receipts, for February, 375,791.

Number of copies printed of Park's Floral Magazine, as indicated by press counters, for March, 377,510.

Editorial.

Cannas in Winter.—Pot-grown Cannas will bloom in early winter if started in mid-summer. Start them in small pots and shift into larger ones as the roots fill the pots. The dwarf varieties only should be cultivated in pots. The plants may be started from a good strain of seeds. For winter flowers, however, it is perhaps better to cultivate plants that have been found by experience to be reliable for winter blooming. The Canna is not generally recommended for that purpose.

Starting Oriental Poppies.—The seeds of many of the biennial and perennial flowers start tardily, and the Oriental Poppies are not an exception. The seeds should be sown in an out-door bed made on the north side of a picket fence, or at least given some protection from the drying sun and winds. A cloth cover is even better, as it prevents drying out, and water can be applied without disturbing the surface soil. Remove as soon as the seedlings show above the surface.

Justicia Sanguinea.—This makes a fine pot plant, and if well grown during summer will bloom freely throughout the winter. Its culture is so simple that anyone can grow it. Shift into a larger pot as soon as the roots begin to crowd, and pinch out the tops regularly, to encourage a bushy habit. In winter every branch will be terminated by a showy head of soft pink flowers, the heads somewhat resembling those of Bergamot in form. The foliage is a bronzy red and handsome.

THE PRICKLY COMFREY.

A CORRESPONDENT in Maine enquiring about a hardy flowering plant she saw growing in an old neglected garden, writes as follows:

Mr. Editor:—Can you tell me anything about a plant I saw for several years in an old garden; a plant which I presume was a hardy perennial, but which has now disappeared? It grew from two to three feet tall, had coarse, rough, dark-green leaves, and at the top bore a cluster of pink buds which began to bloom from the base of the cluster, and the flower was a pretty shade of blue. A photograph of the plant, when in bloom, would appear very much like the picture of the tobacco plant. The pink buds and blue blossoms, all in the same cluster, made the plant a great curiosity to all who saw it, but nobody, so far as I can learn, ever knew what to call it.—A. F. V.

The plant was probably a Prickly Comfrey, known botanically as *Symphytum aspernum*. It belongs to the Borage family, a common characteristic of which is to have pink buds and blue flowers. The leaves are pointed at both ends, and covered with rigid hairs, which make them very rough. The plants like a moist, shady place, are hardy perennials from the Caucasus, and grow to the height of four feet in good soil.

A near relative is *Borage officinale*, which has broader leaves, veined and crinkled, but not so rough as those of Comfrey. The plants grow from one to two feet high, and are biennials easily grown from seeds.

Red Spider.—This is a mite which affects plants during a dry season, or when kept in a dry atmosphere. It mostly infests the under side of the leaves, appearing as a rust, drawing the leaves and drying them up. It is especially troublesome upon Roses, the Leopard Plant or *Farfugium* and *Fuchsia*. When the pest appears it is evidence that the atmosphere is too dry for the health of the plants. A remedy is to sponge the foliage with hot suds made from quassia chips tea and soap. Or, the material may be applied with a good brass syringe, being careful to reach the under side of the leaves. Frequent syringing with water is a preventive of red spider, as it does not like moisture or dampness.

Coronilla varia.—This is a hardy herbaceous creeping perennial found in Europe, and has been in cultivation since 1640. It bears pink, Pea-like blossoms in clusters of from fifteen to twenty flowers each, and blooms from June till November. The stems die in autumn and are renewed in the spring. The plants are propagated from either seeds or cuttings, and are adapted for edgings or the rockery.

A BEAUTIFUL GENTIANWORT.

WHEN traveling through Texas in August the Editor saw along the railroad banks clumps of large and beautiful flowers ranging from white to deep violet purple, borne on stalks two feet high. Each clump showed a number of flowers, and the natural display was very attractive. Upon closer examination the plants were found to be of the Gentian

family, and of the genus known variously as Eustoma and Lisianthus. The species in Texas is called by the specific name of Russelianum. It is generally considered an annual, and seems to like a hot, sunny place.

Lately a correspondent from Woods county, Oklahoma, sent specimens of the same plant, including roots, stems, foliage and the flowers in various colors, the flowers measuring two and a half to three inches across. With the specimens came the following descriptive note:

Mr. Editor.—Enclosed are pressed flowers, a branchlet of matured seed capsules, two mature leaves, a section of stem with leaves from a small branch just budded for blooming, and roots of a small, matured plant of a generally admired but unknown wild flower growing on low, sub-irrigated land, usually of a salt or alkali character. It is variously named "Wild Tulip," "Blue Lily" and "Blue Bells," for the form and prevailing coloring of its beautiful flowers, which remain fresh a long time, either on the plant or when cut. The plant grows from one to two feet high, is covered with a faint, grayish white bloom, and its juice, or sap rather, is of a slightly milky character, becoming yellow and gummy in the seed capsules as they near maturity. A summer's observation does not enable me to say whether the plant is annual, biennial or perennial, but I incline to the opinion that it is a biennial. Its time of blooming is from the last of June until frost, but chiefly in July and August. Only small plants, or plants from which flowers are removed, bloom late. Colors, purple, blue, lavender, to white, with darker or white

eye; rarely pink with darker eye, and white with eyes of all colors. I have counted one hundred and forty-two seed capsules on one plant. S. M.

Woods Co., Okla.

The engraving made from a drawing of Eustoma will give the reader a good idea of the form of the stem, leaves, buds and flowers. The beauty, delicacy and showiness of the flowers, together with their varied colors, should recommend this southern wild flower to a trial in our gardens. It should not be difficult to grow, if its propagation and treatment were familiar. Have any of our southern friends tried to cultivate it in their garden?

Propagating Snowballs.—The Snowball (Viburnum) is rather difficult to start from cuttings, but a moderate degree of success may be attained even by the amateur if the cuttings are taken of half-ripened wood and inserted in a mixture of half sand and half coal ashes, the insertion being of both ends of the cutting, allowing only the middle bud to remain above the surface. A better method of propagation, where but two or three plants are wanted, is to bend the lower branches, make an insertion of the knife-blade half through the stem, from the under side, six inches from the tip, and bury the cut part in the soil, allowing the tip to protrude. The next spring the branch will be well rooted, and can be cut off entirely and removed to where it is to grow. Propagation of the single-flowered Viburnum may also be effected from seeds sown as soon as ripe.

Black Calla.—To bloom the tuber of Black Calla should be very large. One two inches in diameter is rarely satisfactory. The plant is Arum sanctum, which has very dark flowers. A more satisfactory blooming Arum is Arum Italicum. Even small tubers of this species will bear flowers, and it is of the easiest culture. Both of these Arums should be rested for several months during the year, and given moist soil and a shady situation while growing.

Chinese Hibiscus.—The complaint is sometimes heard that plants of Chinese Hibiscus do well in summer, but invariably die during the winter. This is due to keeping plants in a temperature too cold and damp, and watering freely while the plants are resting. A moderately warm, dry atmosphere suits the plants in winter, and water them only enough to keep the soil from drying out. In summer water freely.

Asters.—If you wish a bed of large, showy Asters plant the large-flowered, tall-growing varieties. The dwarf sorts are preferable for pots and bedding, as they are dense, and bear masses of flowers on erect stems; but the most satisfactory Asters, as a rule, are the large-flowered, tall ones, such as the Victoria, Perfection and Ostrich-feathered kinds.

THE CHINESE PRIMROSE.

(See illustration on 1st Title Page.)

FOR WINTER blooming in pots in the window the Chinese Primrose stands without a rival. The plants are easily started from seeds, thrive under ordinary treatment, have beautiful foliage, large clusters of showy and beautiful fringed flowers of various colors continuously borne, and are free from insect pests. Any person can grow the Chinese Primrose, and when the plants become of blooming age they cannot be kept from blooming. They never fail to please and satisfy their owner, if given a modicum of the treatment they require.

The seeds should be sown in May, June or July, to have strong plants ready for winter blooming. Sow in pots of sifted and pressed woods soil, or soil that will not bake, covering only about one-eighth inch deep. Water freely after sowing, but afterwards simply keep the ground moist till the plants appear, which will be in about three weeks. Give the young plants air, and water only in the morning of clear days. Keep the soil stirred among the young plants. When large enough reset the plants into shallow trays or boxes, placing them two inches or more apart, and when they begin to crowd again transplant into tin vessels, holding a quart of soil, one plant in each, setting the plants so the crown will be above the surface. The amateur always meets with the better success growing Primroses in tin vessels than in earthen ones. Water regularly and give partial shade during bright, warm weather.

The engraving on the title page is from a photograph of a windowful of seedling Chinese Primroses, and will give the reader an idea of what success may be obtained by expending ten or twenty cents for a few choice seeds, and giving the plants good care while developing.

Ilex.—Ilex is not difficult to start from seeds, if sown before the seeds dry out. After that they germinate tardily. The common Ilex verticillata, which grows in swampy places and appears as a flame of scarlet berries in late autumn and early winter, should be sown in fall or early spring. It is one of our most showy and beautiful native shrubs, and should be generally cultivated.

Seales.—Rub these insects loose from the stems and sponge off with hot quassia chips tea. Afterwards syringe at intervals of three days with the same material, and the enemy will soon disappear.

SEED GERMINATION.

PLANTS of shrubs and trees do not, as a rule, start readily from seeds. Catalpa Kæmpferi and other species, as also Ailanthus, Paulownia, Calycarpa, Deutzia and Syringa will germinate in a reasonable period, say less than three months; but Ampelopsis, Clematis Jackmani, Locust, and many other sorts will often remain dormant for many months. In some instances germination is hastened by removing the fleshy coating, as in Ampelopsis. Prompt germination is also promoted, especially in seeds of hardy trees and shrubs, by fall sowing, which allows them to become frozen and the covers thus burst by the action of frost. This is especially noticeable in starting Berberis, Cercis canadensis, Cornus florida, Acer or Maple, Quercus or Oak, Rosa rubiginosa or Sweet Briar, and most of our native nut trees.

Pansy Geranium.—Most of the varieties of Fancy Pelargonium, often called Pansy Geranium, bloom only during the spring months. During the summer and autumn they make a fine growth if properly cared for, but the buds and flowers will not appear till spring. For winter blooming such Zonale Geraniums as Dryden, America, and Mrs. Hill, should be grown. These bloom almost continually, but are not so charmingly marked, nor so large as the Choice Fancy Pelargoniums. All may be propagated from seeds sown in the spring and summer.

Narcissus.—The Chinese Sacred Lily is a variety of Polyanthus Narcissus, and like other kinds of Narcissus it requires a damp, cool, well-lighted room to develop its flowers in. When the roots are developed and the temperature moist and cool the flowers appear in fine clusters from bulbs grown either in water or earth. If not well rooted, and the temperature is hot and dry the buds that push up will mostly dry up before they develop into flowers.

Water Lilies.—For ordinary use the white, fragrant Water Lily is the most desirable. It has handsome foliage, and beautiful flowers and nearly always does well. For a stagnant pond an algæ and often water pests become troublesome. A little fresh slacked lime introduced as lime-water will mostly destroy these without injuring the Lilies, if not applied too strong.

Baby Primrose.—This charming little Primrose is readily propagated from seeds, and blooms in three or four months after sowing. Seedling plants do better than plants kept over, though divided and repotted plants will bloom well the second year, if not exhausted blooming the first year.

Garden Culture.

ABOUT ANTIRRHINUMS.

LAST year I had some Antirrhinums blooming in a box. I brought the box in when freezing came on, and had the blooms to vie with the Chrysanthemums at Thanksgiving. After the blooms were gone I cut back the tops, and set the box in the cellar, in front of a south window. In spring I brought it up, and the plants came on much earlier than spring-sown seeds. I had the giant sorts in a round bed with dwarf sorts as a border, and it was wonderfully beautiful. The dark, glossy foliage was not harmed by the freezing of the soil. A few bright blossoms lingered until November eighth, and the evergreen leaves are still beautiful. Some in a "tree box" are just as presentable as any we ever saw. I have two sorts of Pyrethrum in the same boxes—Golden Feather and double White, so that I have four shades or tints of color still to enliven the dreary outlook. The Antirrhinums are dark green and purpleish brown, and the Golden Feather is yellowish. While the double white Pyrethrum is a grass green, and though there are no flowers left, the boxes look very pleasing. I have cleaned away all unsightly leaves and twigs left from the tender plants that were frozen and now the evergreens have it all their own way. I am interested to know how long they will stand against Old Winter. As a cemetery plant the Antirrhinum must prove valuable, as it lasts so long in autumn, and even shows the snow so green and cheerful speaking of life in the midst of death.

Mrs. H. P. Piper.

Lapeer Co., Mich., Nov. 7, 1903.

[NOTE.—The new large-flowered semi-dwarf varieties of Antirrhinum or Snapdragon are very beautiful and desirable flowers for either beds or pots. The plants are compact and bushy, while the large, fragrant flowers are borne in large spikes. They will doubtless become very popular when better known.—ED.]

Wistaria Vine.—I have a Wistaria Vine that blooms twice a year. Early, before the foliage comes, and in July, it is loaded with its long racemes of purple bloom. It is trained into the gables on the north and east front, running across the front and end of the porch, and then over wire netting on the upper porch, and on wire netting into the gables. It is a thing of beauty, and a joy at least during the summer.

Mrs. C. W. Gillian.

Greenbriar Co., W. Va., Aug. 3, 1903.

Tuberous Begonias.—Tuberous Begonias are very nice for north or east windows, and are equally nice for a shady bed in the yard, but must be protected from the wind.

Aunt Anna.

Lincoln Co., Wash.

NASTURTIIUMS.

LAST year I said next season I would have all the Nasturtiums I wanted. I planted three ounces of seeds, tucked them in everywhere; around trees, Pæony clumps, along the fence among Dahlias, and Holly hocks. They bloomed in six weeks, and grew like "Mr. Finney's Turnip." I don't agree with other writers. I give mine plenty of liquid fertilizer once a week. Every perfect flower is picked. One time thirty-two

distinct colors and markings were counted. The reds were so large and brilliant, with dark foliage that made them uncommon.

Worcester Co., Mass.

E. B.

The Children's Corner.—There is a small lot between the lawn and vegetable garden. The lot is about three rods long, and one rod wide. The center of the lot is covered with a grape vine arbor. The children's play house is under the grape vines. The grape vine shades the east and south side and a Wild Cucumber shades the west side. The north side is open. Many happy hours are spent in that play house. Their table is made out of a square box with four legs nailed on. Their flower vase is a large necked bottle and they have three little crabs in a glass vasaline jar, which are fed one worm a day. I shall save a lot of Morning Glory seed and will plant it around the play house next spring. They have a white Pansy in a box for their house plant and it never suffers for water.

Letta S. Garverick.

Crawford Co., Ohio, July 20, 1903.

Cosmos.—I had a bed of the Giant Cosmos, and if there is anything that could look nicer, I would like to know what it is. They grew about six feet high, and from September until November were covered with pink and white bloom, not unlike small, simple Dahlias. Everybody who saw them admired them.

Mrs. Ruth Myers.

Ashland Co., Ohio, Apr. 12, 1903.

Valeriana.—Valeriana, or garden Heliotrope, as it is sometimes called, is a perennial, bearing clusters of white, sweet-scented flowers. Mine bloomed the last of May, and the flowers were in good condition for two months. Its lasting qualities are enough to ensure it a place in every garden. It is not showy, although it has plenty of foliage, and is a dainty flower for funerals, as it lasts long.

Fayette Co., Iowa.

Aunt Jane.

SWEET PEAS.

IN nearly all the directions for growing Sweet Peas, we are advised to plant them so the rows will run north and south. I followed these instructions for six years, with very indifferent success. This spring I desired to change the location of my Sweet Pea bed and see if they would not do better. In the only available place the rows would have to run east and west.

I decided they could not do much worse, so the ground was prepared, a wire trellis put up, and the seeds planted. The season was late, cold and wet, and they were late coming up, but when they did start they grew nicely, and soon covered the support. The flowers were freely produced, were large and a fine variety of colors, more white ones than usually come in mixed seeds.

I had only a short row, probably six or seven feet long, but for three months I gathered two, sometimes three, large bunches every week. I neglected to mulch, or give the vines any fertilizer, and while they gave a few flowers until fall, they were not so freely produced as earlier in the season. I was very well satisfied with my experience, and decided that the direction of the row did not have so very much to do with growing Sweet Peas successfully, provided they are in an open place, and can have plenty of sun. I believe the main things are deep planting, shallow at first, filling up as the vines grow; rich, mellow soil, plenty of water at the roots, and a good rich mulch after dry weather sets in.

Allen Co., Kan., Dec. 2, 1903 Lide.

[NOTE.—With the above suggestions and a good mixture of the new large-flowered varieties of Sweet Peas, there should be no reason for complaint. As stated, avoid deep covering. It is better to sow early in a trench, covering only from one-fourth to half an inch deep, than to sow in shallow rows covering two or three inches deep. When planted deep while the ground is cold and wet the seeds are likely to rot. Furnish support as soon as the plants are up, as they will very soon need it, and if neglected they will become stunted and make a delicate, almost flowerless growth.—Ed.]

Nasturtiums.—I saw in Park's Magazine how to put Nasturtiums in a pitcher half full of charcoal, and filled up with water. I tried it and found it did nicely, but I would suggest cutting off all of the old leaves, and putting in an out-of-the-way place until new leaves form, for all of the old leaves turned yellow and had to be cut off. Mine were full of new leaves and buds when our first freeze came, just before Christmas, and I failed to set them out of the window and consequently lost them, but will try again.

Clark Co., Ky.

Aunt Nan.

CHILDREN AND FLOWERS.

NEARLY all children take great pleasure in flowers, and parents would do well to cultivate this love for the beautiful, for its pure and elevating effect on the young minds. It is well, wherever possible, to give each child a flower bed and let each have full care of it, under the parental direction. There are many homes in the country that are beautifully situated, and could be easily made to minister to the good and pure in children's minds, but the surroundings are so barren of flowers, shrubs, or trees, that the appearance is depressing instead of elevating. The chickens must have a place to run, or it is "a waste of time just to raise flowers," and so for a few paltry cents of gain from the chickens, or a few hours time, the children are left without the inspirations of the beautiful in their home surroundings. The money expended for unwholesome sweetmeats would be sufficient to beautify some little spot near the home and so give pleasure to both old and young. Nothing will bring the heart of a child nearer to God than to contemplate the beautiful things which He has made.

A. M. D.

Sagadahoc Co., Me., Sept. 15, 1903.

[NOTE.—A little flower garden surrounded by chicken wire can be prepared with little expense, and in this the children of the family can each have a bed of flowers, by suggestions and encouragement from the older members of the family. Packages of easily-grown seeds should be given them, with directions for culture, and perhaps some assistance in preparing the beds, sowing the seeds and setting out the plants. Persons interested in Sabbath and day schools should remember the moral influence of flowers, and encourage the children by gifts of seeds in spring. Such gifts are as seeds sown on good ground, and will yield a good return in the happy influence they wield upon the lives of those who receive and care for them.—Ed.]

Cosmos.—My Cosmos bloomed all summer. I made boxes of laths, three wide at the bottom, two high on the sides, and board ends, thick enough to nail the laths to. Then I filled the boxes with good garden soil, and sowed the seeds in March. To water them I set the boxes into a pan of lukewarm water until the soil appeared moist on top, then I placed them in the sink to drain, and placed a wet woolen cloth over the soil. When the seeds began to come up I took off the cloth and used a pane of glass, keeping the boxes near the window. As soon as the plants are large enough I transplant into thumb pots. They began blooming the last of June.

Mrs. R. Baker.

Lawrence Co., Mich., Nov. 3, 1903.

Seedling Petunias.—Out of a packet of the Giant Ruffled and Fringed Petunias I got over a dozen fine, odd varieties. One pure white, very ruffled, a clear gray one, some purple, very near black, and one dark purple with white spots, making a fine, showy bed.

Sister Bert.

Somerset Co., Me.

Bulbous Flowers.

THE CANNA.

THE FANCY-LEAVED CALADIUM.

THE Fancy-leaved Caladium is a most valuable plant for decorative purposes.

The foliage is brilliant and handsome, and remains so a long time. I use a six-inch pot, but think they could be grown in smaller ones. I have the pots perfectly drained, and use a compost of turfy loam, well-decayed manure and leaf-mould, well mixed. When the plants are growing I water freely. Never let them suffer for want of water. An occasional supply of liquid manure and pulverized charcoal will add to the beauty of the foliage. During the summer months they should be placed in a shady position, as they can not endure the hot sun, and the foliage will not have that rich, healthy appearance it has when grown in the shade. I give them a shower bath daily. They are never troubled with any kind of insect pests, and bear confinement with impunity. The Caladium is one of the best foliage plants we have for cultivation in the window garden. They are greatly admired when properly grown and taken care of. The bulbs increase from year to year, and in the course of a few years the pot will fill with bulblets from a single bulb. I repot my bulbs every spring, as the plants die down in the fall, and I keep them with the other tender bulbs during winter and water only enough to keep the soil from becoming quite dry. In March I re-pot in fresh soil. All lovers of pretty foliage plants should try a few bulbs of the Fancy-leaved Caladium.

McIntosh Co., Ga. Geo. Mansfield.

A Good Pond Plant.—*Pontederia cordata* is a common native plant, but very beautiful and attractive for growing in shallow water. It grows two or three feet high, in the form of a Calla Lily, with heart-shaped leaves. The blossoms are borne on tall spikes. Each flower is six-lobed, the upper one containing a heart-shaped, yellow spot. They are a beautiful shade of blue, and produced all summer.

Jessie Lynch.

Yamhill Co., Org.

[NOTE.—A curious habit of *Pontederia cordata* is that after blooming the scape curves until the young seed-pod is immersed in the water, and it thus remains until the seeds are ripe. The plant is beautiful for a pond, and is hardy and of easy culture.—Ed.]

Allium Aureum.—I love yellow flowers, and this is one of the easiest grown. I procured one bulb six years ago and now have two large clumps of it. All it needs is to be undisturbed, and it is sure to bloom and increase. Its cheerful yellow flowers brighten up the home garden. When once planted it requires no attention for many years, but may be taken up every season.

Ontario, Can.

Mrs. T. A. Bishop.

OF LATE years the Canna has rapidly come to the front as a bedding plant.

This is not very remarkable when we recall the great improvement of the Canna within the past few years. The flowers, of different shades of red and yellow, are almost as large as those of the *Gladiolus*. They are produced continuously from July until frost kills the plants in autumn. In addition to the flowers, the foliage is ornamental, being of a reddish color on some plants and deep green on others, while the leaves are broad and large, giving the plant a tropical appearance. The newer varieties are dwarf in growth, most of them growing about four or five feet high. The Canna succeeds best in moderately rich soil, made as loose as possible. About the first of May is the best time for planting in the open ground, although they can be planted out as late as the first of June. The Canna is a moisture-loving plant, but will stand considerable dry weather. It blooms best when well watered during dry weather. The seeds of Cannas are somewhat slow to start unless they are filed or cut through the outer shell.

W. C. Mollett.

Wayne Co., W. Va., Jan. 4, 1903.

Spotted Callas.—Why do we not see more beds of Spotted Callas? They are as easily managed as *Gladiolus*. Successive planting produces various blooming periods. They like partial shade, and I find the east side of the house, around a small pear tree, an ideal place for them. This season the Calla bed is carpeted with beautiful Pansies, the glossy green and spotted white leaves towering above them make it one of the most cherished spots in my yard. In the fall, before freezing, they can be potted and kept in the window, where they will bloom for Easter. The bulbs can also be dried off and kept in the cellar to bed out in the spring. When thus treated they are a long time in starting, and if put in the ground too early will rot. The last of April or first of May is usually a favorable time to set them in the ground.

E. B.

Worcester Co., Mass., Aug. 29, 1903.

Dahlias.—The Dahlia is one of the most valuable of summer-blooming bulbs, as the blossoms are large and comprise many shades of red, yellow and pure white, with striped combinations of these colors, making them very conspicuous in the garden, as well as fine for cut flowers. Each blossom will remain perfect for at least a week. They grow in any good garden soil and can be wintered where potatoes will keep. The secret of keeping them is to thoroughly dry the tubers before putting them in the cellar.

Kate Little.

Filmore Co., Minn.

Floral Poetry.

WILD PLUM BLOSSOMS.

Over the earth the sky arched blue,
And the sparrows twittered the whole day through,
While sweet from the thicket the fresh breeze blew
The breath of the Wild Plum blossoms.

They walked from school in the olden way,
A lad and a lassie young and gay;
And she wore at her throat a milk-white spray
From the wealth of the Wild Plum blossoms.

And he told his love, all gallantly,
And his dreams of the years that yet would be;
Ah, the shrine that they beguiled to memory
And the breath of the Wild Plum blossoms!

The day was bright when he marched away,
And the lad was grave though the lass was gay;
But her face was white for many a day—
White as the Wild Plum blossoms.

The days went on, as the days must do—
Went on and on, till the war was through;
But never a dream that they dreamed came true—
The dreams 'midst the Wild Plum blossoms.

And the lassie's head is bent and gray,
And the gallant laddie far away;
But the old-time joy comes back to-day
With the breath of the Wild Plum blossoms.

Phillips Co., Kas.

Alice W. Willis.

THE WHIPPOORWILL.

There floats a note from yonder hill,
Where zephyrs softly croon;
The joyous calls of whippoorwill,
Anent the full-orbed moon.

The Oaks and Hickories standing round,
With leaves as silver bright,
Repeat with joy the rapturous sound,
And rustle with delight.

The fleecy clouds which silent float,
Smile in their moonlight sheen;
As if the heaven itself did gloat
Upon the tuneful scene.

The cuckoos and the tawny thrush,
With all the daylight throng,
Are silent in the Hawthorn bush,
List'ning to Night's sweet song.

O happy, happy whippoorwill,
No shadows thee appall;
Nor basky glooms with terror fill,
Or taint thy cheery call.

'Tis Love inspires thy vesper hymn,
Thy mate is by thy side;
Nor darksome thoughts, nor specters dim,
With Love can e'er abide.

Ringgold Co., Iowa.

Persis Heaton.

NOW.

Wait not, I pray, till my life is spent,
And my mouldering body shall lie,
To use fragrant flowers as friendship's regard,
But use them before I die.

One bud now given as a token of love,
Is worth many thousands of roses,
Or wreathes of white lilies o'er dark-brown clay,
That marks where my body reposes.

Rather cheer me along life's toilsome way
By a kiss or a handshake given;
For little I'll reck of the wreathes at the tomb,
When my spirit is happy in heaven.

Ellis Co., Tex.,

T. H. Yarbrough.

THE PLANTAIN.

Little yeoman in the dooryard
Of lone, deserted farm,
In the spring you quickly gather
To shield it from all harm;
And through the sun-lit summer
So valiantly you stand,
With broad green shining banners,
And slender spears in hand.

The Lilac brings her blossoms
Of tender purple hue,
And waves them near the windows,
Tho' none are there to view;
And the fragrant Sweet Brier leaning
Against the building lone,
Looks on the yeoman army
Encamped around door stone.

Where in ranks you stand all ready,
Uplifting spears of green,
A fearless, rustic army,
Your bravery is seen,
For no foe lurks near the dwelling,
So faithfully each day
You guard the tender memories
Of years now passed away.

The wild birds in the tree-tops
Are sentinels, 'tis true,
And watch from dawn till sunset
From their lofty point of view;
And the yeoman army waiting
'Neath Nature's magic spell,
Receives glad tidings daily
From bee scouts, "All is well."

Merrimack Co., N. H.

Ray Laurance.

ANTIRRHINUM MAJUS.

With stalk and leaf like burnished leather,
Or like some tropic bird's gay feather,
My Antirrhinum rises;
Rewarding amply all my labors,
The admiration of my neighbors,
'Tis one among my prizes.

With blossoms highly ornate growing
On slender stems, and daily showing
New ones above those fading,
Each like an oddly-figured jewel,
Or knitting work of fancy crewel,
With darker tints for shading.

A perfume exquisite, though subtle,
Comes forth as Nature's magic shuttle
Works at its constant weaving;
Some plants for being richly scented,
More frequently are complimented,
While less delight achieving.

Coles Co., Ill.

Robert S. Davis.

WHITE VIOLETS.

Close in the shade of the low gray wall
That curves 'neath the Maple trees,
Pale Violets hide in mute defense
'Gainst the quest of wanton breeze.
But their hearts' sweet life—like incense rare—
Steals up on the sunbeam's gold,
Betraying the wealth of snowy bloom
That emerald leaves unfold.

Green Co., O.

Philippina Barlow Sabin.

THE FAIRIES' HAIR STORE.

I passed through the woodland,
When winter was o'er,
And there I beheld
The fairies' hair store.
There were tresses so wavy,
And tresses so fair,
Ah, people have told me
'Twas just Maiden's Hair!

Sagadahoc, Co. Me.

Alice May Douglas.

Pot Culture.

BOUGAINVILLEA.

LEPTOSIPHON DENSIFLORUS.

ONE of the most free-blooming and beautiful of the many species generally classed botanically under the genus *Gilia*, is the one represented in the engraving, known in catalogues as *Leptosiphon densiflorus*. The plants start readily from seeds sown in the open ground, and should stand six inches apart in the bed. The foliage is very narrow and makes a delicate and attractive background for the profusion of flowers, white and blue, which crowd each other in a dense mass when the plant is in full bloom. Being a hardy annual, the seeds may be sown as soon as the ground can be worked, and will bloom all the better for such early starting. It is a native of California, and like most of the California annuals, may be sown in the open ground in the autumn in many sections. As an edging, as well as a summer pot plant, it is handsome, and deserves general cultivation.

LEPTOSIPHON DENSIFLORUS.

Begonia rubra.

—*Begonia rubra* has glossy green foliage and bright flowers of a rose-scarlet color, which, together, make an attractive house plant. It is inclined to grow leggy, and should be pitched well in. When new shoots have grown tall enough for standards, they should have the tips pinched out. They will then send out one more shoot which should be pinched just above the set of eyes. They will then branch sufficiently, and the old stalk may be cut away and set for rooting if divided into short slips.

Marion Howard.

Santa Cruz Co., Cal.

Umbrella Plant.—If you want to succeed with the Umbrella Plant, cut all the blooms off. In a short time new shoots will come out between the old leaves. Always keep water standing about one inch above the surface soil, summer and winter.

Mrs. H. S. Hall.

Middlesex Co., Conn., Nov. 23, 1902.

I RECEIVED a plant of *Bougainvillea*. It was potted in a pint can in good garden soil, kept moist, but not wet, and in partial shade. In a short time it had to be repotted in a quart can. It was then time to put my flowers in the pit. I followed directions and gave it plenty of sun all winter, but scarcely any water. It dropped all of its foliage, but when spring came it showed signs of new growth. I then potted it in a six-inch pot, and it sent out leaves and green bracts which soon changed to a lovely bright purple color. Later the small creamy flowers inside the bract opened. It was an odd and beautiful sight. I never before saw so small a plant have so many blooms. Everyone admired it, both for its beauty and its oddity. Mrs. J. J. M.

Marlboro Co., N.C.

Geranium.

What plant is more useful or desirable than the *Geranium*? Its giant clusters of brilliant flowers stand the blazing sun for weeks. Touch the foliage, and the spicy fragrance will make you homesick for "mother's garden." None other is such a keen reminder of childhood's days as the *Geranium*, be it the Balm, Ivy, Rose, Lady Washington or Gen Grant. Its outward variations are many, still it is the same dear old plant, gracing alike

the conservatory or the cottage window.

Jennie Lee Bain

Columbia Co., N. Y.

Pineapple Geranium.—I have grown some fine plants of Pineapple Geranium. I find they are very susceptible to the mealy bug. To have a nice plant that will retain the large healthy leaves which first come on, don't let it become root-bound. Shift it as fast as it grows. The one I had, when in full bloom, occupied a large wooden bucket. It stood as high as a double window, and how it did bloom! Every branch showed many long spikes of the pretty red blossoms.

Woods Co., Okla.

Mrs. Hutch.

DAINTY GREEN FOR WINDOW AND CUT FLOWERS.

NO WINDOW garden is complete without several pots of dainty green foliage plants for mixing in bouquets of cut flowers, and for a background for flowering plants in the window garden. The old glossy Smilax has won a place for itself, and is so graceful and dainty, and so easily grown that many prefer it to all other greenery for the winter window garden, as well as for other decorations where a bit of dainty, lasting greenery is required. Last spring I succeeded in growing a number of pots of this from seeds with no more care than is required for the Verbena. The dainty green and feathery, airy grace of the Asparagus, as well as the habit of retaining their freshness for days when cut, have made them the most popular of the many valuable plant introductions of recent date. There are several varieties of the Asparagus but two of the most desirable sorts are Plumosus and Sprengeri. Plumosus is one of the most delicate and beautiful of all the foliage plants. I have seen it fresh and green on graves, days after it had been placed there, when all other cuttings had become brown and lifeless. Sprengeri is on an entirely different order, but is a very beautiful and popular basket, or pot plant, and is also desirable for cut flower purposes. In our list of green we must not overlook the Boston Sword Fern which is a superb plant for either pot or basket. I have seen some very fine specimens grown by those who declared they did not know enough of floriculture to grow a Geranium. It will stand any amount of neglect, yet responds wonderfully to a little care, and is a most imposing plant in the house in winter, if given a little attention and kept free from dust.

Laura Jones.

Lincoln Co., Ky. Dec. 12, 1903.

[NOTE.—A very pretty and deliciously fragrant plant for cutting from for bouquets is the *Artemisia annua*. Some call it Sweet Fern because of its sweet, fern-like sprays. It is of the easiest culture, and an annual that will thrive in any garden.—Ed.]

Saintpaulia ionantha.—This is a charming plant. The leaves are small and hairy, and grow close and low, forming a rosette. The blooms are deep blue, something like a Violet. It is easily grown and a constant and most profuse bloomer. Mine stands on a bracket by an east window, and has never been troubled with insects of any kind. It is now, and has been all winter, a mass of lovely flowers and pretty foliage. The leaves will root in water, like Gloxinias.

H. E. L.

Hartford Co., Conn.

Weeping Lantana.—This is a choice summer plant for pots. It blooms profusely and continuously.

BEGONIA, PRESIDENT CARNOT.

IF THERE is anything prettier in the Begonia line than a well-grown plant of President Carnot Begonia, we want to know it, so that we can obtain a plant. Ours, of the above variety, has not been without blossoms since June, and is now, Christmas eve, the occupant of a three-gallon pail, with numerous branches and beautiful bloom panicles. Its foliage alone is beautiful. While not quite so attractive as the *Argentea Guttata*, it is a much more rapid grower for us. Our plant was a small one last May. It has been a much more robust plant than the far-famed *Rubra*, but then all Begonias are very attractive to me.

E. C.

Edgar Co., Ill.

Maidenhair Fern.—Of five varieties of ferns in my collection, the Maidenhair is the prettiest, and should be in every plant-lovers collection. It may be obtained in nearly every State, and is easily cultivated. It can be taken up and transplanted at any time. I have a large bed at the north side of a wall, which is a mass of delicate, waving fronds, from early spring until autumn. The bed is composed of woods earth, a foot thick, with a layer of broken brick beneath for drainage.

Nat. S. Green.

Hamilton Co., Ohio.

Cyperus alternifolius.—Since I learned how to treat *Cyperus*, no house-plant has afforded more satisfaction. I had always watered it freely, but it gave only three or four perfect umbrellas at a time. Last fall I set the plants potted in good soil into a jardiniere, which I kept filled with water nearly to the top of the pot. As the result it has between twenty and thirty umbrellas, perfect to their tips, and several more starting. It has no insect enemies, and to me is more graceful than a Palm, and requires much less care.

F.

Erie Co., Pa.

Araucaria Excelsa.—I bought this plant two years ago. It had only two tiers of leaves; the third tier was just beginning to show. It is now growing in an eight-inch pot, and has seven tiers of those lovely perfect-shaped stars. The leaves appear five at a time, and form a star about eight inches between each tier. The lower limbs droop in the most graceful way imaginable. They reach the stand on which the pot is setting.

Mrs. J. C. S.

Sumter Co., S. C.

Seedling Geraniums.—Geraniums are as easily grown from seeds as from cuttings, and seedlings started in early April will blossom in October.

Anonymous.

Ontario Co., N. Y.

Trees and Shrubs.

THE LILAC.

ONE of the most delightful shrubs in the flower kingdom is the Lilac. This, our grandmother's old-time favorite, is as sweet and charming as in years long gone. No other flowering shrub, except the Rose, is such a universal favorite and so dear to our hearts. It is a strong grower and will fight its way through an old stone wall and flourish, never failing to cover itself in the flowering season with loads of purple fragrant bloom. It is thoroughly hardy in our northern climate and endures the rigors of our most severe winters.

I have grown the white Lilac, but I prefer the purple. The white grows very much taller than the purple.

The Lilac is said to be of oriental origin, and was brought into Europe about 1550. Some fifty years later it was called in Morin's catalogue *Syringa Corrolla Lusitania*. In 1601 it was common in the gardens of Belgium and Germany. It appeared a little later in Paris where it was prized and sought after by the wealthy, and fabulous prices were often paid for little sprouts no more than a foot high. Among the pleasantest of childhood's memories is the big pitcher of Lilacs on mother's stand, filling the whole room with its sweetness.

Wash. Co., Vt. S. Minerva Boyce.

Habrothamnus elegans.—It's budded! On investigation I found a cutting of *Habrothamnus* budded, after waiting several years for the old plant to bloom, and having grown into a miniature tree, it was consigned to the cellar (to live or die) until spring. The small cutting surprised me by blooming. It seems the longest named plants are the longest time blooming, but I feel well repaid for the care and trouble when they do bloom. Ima.

Geauga Co., Ohio.

Oleanders.—Keep the Oleanders well pinched back. You can train them into beautiful trees. In the blooming time give plenty of water and fertilizer. Mine has over one thousand buds and blossoms. It is six feet high, and only five years old. It is a perfectly formed tree. If well fed and pruned, the blossoms are much larger.

Somerset Co., Maine. Sister Bert.

Shrubs.—I would highly recommend the Forsythia. It is the earliest shrub to bloom in the spring—a bright yellow in color. The *Berberis Thunbergi*, and the *Deutzia* in variety; also *Spireas*, *Keria Japonica fl. pl.*, and last, but not least, *Weigelia floribunda*. These are only a beginning. You won't know where to end.

Mad. Co. Ill. Mrs. M. A. Buckner.

DOCTOR DID IT.

Put on 86 lbs. by Food.

Feed a physician back to health and he gains an experience that he can use to benefit others. For this reason Grape-Nuts food is daily recommended to patients by hundreds of physicians who have cured themselves of stomach trouble. One doctor says:

"Although a physician and trying to aid and assist my fellow beings to enjoy good health it must be admitted I formerly did not enjoy the best of health myself. In January, 1899 I only weighed 119 pounds. At this time I was living in the Ohio valley and began to think I had about seen my best days. One day about 3 years ago I had an opportunity to try Grape-Nuts food for my breakfast. I liked it so well that I ate three teaspoonfuls three times a day and have regularly used it up to the present time, and I now weigh 155 a gain of 36 pounds and enjoy the best of health.

"Not only has Grape-Nuts made this wonderful change in me but through it I have helped my friends, relatives and patients. The sustaining power of this food is simply wonderful.

"I have one patient who is a section hand on the C. & O. R. R. who eats nothing in the morning but four tablespoonfuls of Grape-Nuts and yet does his very hard work up to lunch time and enjoys the best of health and strength.

"I could name a great many cases like this and I still prescribe Grape-Nuts in my practice every day." Name given by Postum Co., Battle Creek, Mich.

Ask any physician about the scientific principles on which Grape-Nuts food is made. He'll tell you the principles are perfect.

Then a 10 days' trial proves that the principles are carried out in the food ("all the good of the grains so treated that anyone can digest it all") Shown in renewed physical strength and brain energy.

"There's a reason."

Look in each pkg. for the famous little book, "The Road to Wellville."

Horse Chestnut.—This tree has been well termed the "Giant's Nosegay." It is a native of Asia. It was brought to England about 1550. It is valuable chiefly as an ornamental tree, its timber being of an inferior quality.

The Horse Chestnut with scarlet blossoms is not so common as we would like to see it. This was brought to England from Brazil in 1820. One has said that at Trieste this tree planted near a dwelling served to drive gnats away—not to draw them, as has been supposed.

Sagad. Co., Me. Alice M. Douglas.

Floral Miscellany.

SWEET PEAS.

MY SWEET PEAS have given me more pleasure than any one flower this year. Early in the spring I dug a trench about six inches deep, put in rich soil from the barn yard, equally mixed with chip dirt, which makes the soil loose, while soil from the barn yard packs and gets hard. Some of the seeds I planted in a circle, giving them brush for support; some I planted in a row, giving them strong cord supported by a frame about six feet high. The vines climbed to the top and would have climbed higher. I like the cord better than the brush. I furnished the support when the plants were small, and banked as they grew. When the weather was warm I put grass over the roots, which kept the ground from drying out. They were lovely, beautiful colors, too numerous to mention. One of the secrets of prolonging the bloom is to not allow seed pods to form. The flowers should be cut every other day at least. Brownie.

Hunterdon Co., N. J.

Mouse-proof Bulb Boxes.—Mice are very fond of some kinds of bulbs, so to avoid them I take large wooden boxes and put them in the cellar. Then I make a lid of wire screening and lath or thin boards. I tack the screening on one side of the box, and the other three sides of screen I tack on lath that fit the top of the box, so that a mouse cannot get in. I have a large box for Cannas and Dahlias, a smaller one for Tritomas, Gladioli and Ixias. I also have a box with a screen lid to put my bulbs in for winter blooming. The box is higher than the flower pots, to give the plants room to grow a little.

Lotta J. Garverick.

Crawford Co., Ohio, July 20, 1903.

My Flower Case.—My Flower Case is made of six windows, three on a side, and sets against the double west windows. It is six feet long, twenty-one inches wide, and thirty-one inches high. It is boarded up, ends, top and bottom, and papered inside and out, with five thickness of wall paper. One middle window is used for a door. Carnations, Freesias, Daffodils, Callas, Oxalis, Chrysanthemums, Primroses, Asparagus, Otaheite Orange, and other plants do finely in it.

Tarrant Co., Tex. Nell McLaughlin.

Cut Flowers.—To keep flowers fresh, I put them in a vessel lacking one-fourth inch of being full of sand, and filled up with water. In that way I have had them fresh for several days, in the hot sun all the time.

Clark Co., Ky.

Aunt Nan.

GRAND WIFE. The Kind Worth Having.

A well-known lady of Carthage, Mo., says: Although I do not drink tea or coffee myself I have had a most interesting experience in my family for about a year ago my husband began to fail in health. He would get so very nervous at times he would have to give up his work and come home. His eyes were failing him and the doctor became alarmed—was afraid he was going to lose his sight. He also got very yellow in complexion, at times his blood ran cold, from nervous chills the doctor said.

"In a few days he would return to work still in that dull, chilly condition. He would drink coffee, coffee, coffee, 'for a stimulant' he would say (as he drank no liquor.)

"His condition gradually got worse instead of better until finally I made up my mind coffee had something to do with it so I bought a package of Postum without telling him, and made it according to directions. He drank it and seemed to like it so I continued to make it and before the first package was gone he began to get so clear a complexion and feel so well, gaining fast in flesh, he was so delighted he would get weighed every day.

"Finally he talked so much about it (he had gained 10 pounds in 10 days) I could not keep it a secret any longer and told him to give Postum the credit. The consequences are there has been no more coffee in the house since (and no doctor either.)

"Postum is a delightful drink made according to directions, I have found no better way as it is a rich golden brown when cream is added.

"I forgot to say husband's eyes are as strong as they ever were, he is well and hearty, does not sit around the stove chilled all the time as he did before." Name given by Postum Co., Battle Creek, Mich.

Coffee poison causes eye trouble in many cases as well as other ails, and is never suspected. A 10 days trial proves things you will never forget.

Look in each pkg. for the famous little book, "The Road to Wellville."

My Ficus elastica.—This plant reminds one of a stately general in his dress uniform, standing ready to inspect his men. It is growing in a ten-inch pot, and is seven feet high, with leaves eighteen inches long, of glossy bright green. I give plenty of liquid manure, and never let it suffer for water. It grows very fast in warm weather. I give very little water when the plant is resting.

THOUSANDS HAVE KIDNEY TROUBLE AND DON'T KNOW IT

Didn't Know I Had Kidney Trouble

I had tried so many remedies without their having benefited me that I was about discouraged, but in a few days after taking your wonderful Swamp-Root I began to feel better.

I was out of health and run down generally;

had no appetite, was dizzy and suffered with headache most of the time. I did not know that my kidneys were the cause of my trouble, but somehow felt they might be, and I began taking Swamp-Root, as above stated. There is such a pleasant taste to Swamp-Root, and it goes right to the spot and drives disease out of the system. It has cured me, and I cheerfully recommend it to all sufferers.

Gratefully yours,

MRS. A. L. WALKER,
46 West Linden St., Atlanta, Ga.

WOMEN suffer untold misery because the nature of their disease is not always correctly understood; in many cases when doctoring, they are led to believe that womb trouble or female weakness of some sort is responsible for their ills, when in fact disordered kidneys are the chief cause of their distressing troubles. Perhaps you suffer almost continually with pain in the back, bearing-down feelings, headache and utter exhaustion.

Your poor health makes you nervous, irritable, and at times despondent; but thousands of just such suffering or broken-down women are being restored to health and strength every day by the use of that wonderful discovery, Dr. Kilmer's Swamp-Root, the great Kidney, liver and bladder remedy.

Why Swamp-Root Gives Strength.

Not only does Swamp-Root bring new life and activity to the kidneys, the *cause* of the trouble, but by strengthening the kidneys it acts as a general tonic and food for the entire constitution.

The mild and extraordinary effect of the world-famous kidney and bladder remedy, Swamp-Root, is soon realized. It stands the highest for its wonderful cures of the most distressing cases. A trial will convince anyone—and you may have a sample bottle sent free by mail.

In taking Dr. Kilmer's Swamp-Root you afford natural help to Nature, for Swamp-Root is the most perfect healer and gentle aid to the kidneys that has ever been discovered. Don't make any mistake, but remember the name, Swamp-Root, Dr. Kilmer's Swamp-Root, and the address, Binghamton, N. Y., on every bottle.

To Prove What SWAMP-ROOT, the Great Kidney, Liver and Bladder Remedy, Will do for YOU, Every Reader of Park's Floral Magazine May Have a Sample Bottle FREE by Mail

SPECIAL NOTICE.—No matter how many doctors you have tried—no matter how much money you may have spent on other medicines, you really owe it to yourself, and to your family, to at least give Swamp-Root a trial. Its strongest friends to-day are those who had almost given up hope of ever becoming well again. So successful is Swamp-Root in promptly curing even the most distressing cases, that to prove its wonderful merit you may have a sample bottle of this wonderful discovery. Swamp-Root, sent absolutely free by mail, also a book telling all about Swamp-Root, and containing many of the thousands upon thousands of testimonial letters received from men and women who owe their good health, in fact their very lives, to its wonderful curative properties. In writing to Dr. Kilmer & Co., Binghamton, N. Y., be sure to say that you read this generous offer in PARK'S FLORAL MAGAZINE. The Proprietor of this paper guarantees the genuineness of this offer. If you are already convinced that Swamp-Root is what you need, you can purchase the regular 50 cent and \$1.00 size bottles at the drug stores everywhere.

All of These--Only 30 Cents.

Price per packet, any variety, 3 cents.

Asparagus Palmetto, $\frac{1}{4}$ lb. 15c., oz. 5c. Columbian Mammoth, $\frac{1}{4}$ lb. 15 cts., oz. 5 cts. Palmetto is an excellent, quick-growing, tender variety. Columbian Mammoth is perhaps better, being white and tender, early, very prolific, robust, and of fine flavor.

Artichoke, Large Globe, the prized French vegetable; ornamental as well as useful, $\frac{1}{4}$ lb. 90c., oz. 25c.

Bean, New Stringless Green-pod, the earliest, hardiest, most productive and most luscious of Bush Beans. Absolutely stringless and tender. The best all-round variety. 1 quart 35 cts., 1 pint 18 cts., $\frac{1}{2}$ pint 10 cts. Other Bush Beans, same price: Extra Early Refuge, Improved Golden Wax, Val. Wax.

Bean, Pole or Corn, Best of All, very early, hardy, robust and exceedingly prolific. Pods large, round, heavy, fleshy, 6 inches long, in big clusters; delicious flavor. A superb variety. 1 quart 50 cts., 1 pint 25 cts., $\frac{1}{2}$ pint 15 cts. Other Pole Beans, same price: Old Homestead, Early Golden Cluster, Scarlet Runner, Lazy Wife, Speckled Cranberry.

Bean, Lima, Early Jersey, Dreer's Improved, Extra Large White, Siebert's Early Lima and Dreer's, Henderson's and Burpee's Dwarf Lima. All same price as Pole Beans.

Beet, New Crimson Globe, early, globe shaped, blood-crimson, exceedingly tender, absolutely free from woodiness and stringiness, and of delicious flavor. $\frac{1}{4}$ lb. 25 cts., oz. 8 cts. Other Beets, same price: Edmond's Turnip, Detroit Turnip, Bassano, Long Blood, Extra Early Eclipse, Crosby's Egyptian, Giant Yellow Mangel Wurzel, Golden Tankard, Mammoth Long Red and Vilmorin's Improved Sugar.

Borecole, a kind of Cabbage. Fine for winter greens, hardy and ornamental. 1 lb. 90c., $\frac{1}{4}$ lb. 25c., 1 oz. 8c.

Cabbage, New Early Spring, surpasses all other kinds, every plant producing a fine head, solid, crisp and sweet, superior for family use and best for market. $\frac{1}{4}$ lb. 75 cts., oz. 20 cts., $\frac{1}{2}$ oz. 12 cts. Others, same price: Early Jersey Wakefield, Charleston Wakefield, Winningstadt, Early Flat Dutch, Early Drumhead.

Cabbage, True Danish Ballhead, the most solid, best-keeping, surest-heading, most popular of late varieties. Every plant bears a good head, round, compact and of the finest quality. It is the most productive of Cabbages. $\frac{1}{4}$ lb. 75 cts., oz. 20 cts., $\frac{1}{2}$ oz. 12 cts. Other sorts, same price: Excelsior Late Flat Dutch, Excelsior Late Drumhead, Surehead, Autumn King or World Beater, Drumhead Savoy, Green Curled Savoy and Red Dutch Pickling.

Carrot, Chantenay or Model, an easily grown and excellent vegetable. The finest sort for garden use. Valuable for feeding stock. 1 lb. 75 cts., $\frac{1}{4}$ lb. 25 cts., 1 oz. 8 cts. Other sorts, same price: Early Scarlet Horn, Oxheart and Improved Long Orange.

Cauliflower, Veitch's Autumn Giant, the most tender and delicious of the Cabbage family. Treat as you would Cabbage. $\frac{1}{4}$ lb. \$1.25, 1 oz. 40 cts., $\frac{1}{2}$ oz. 15 cts. I can also supply Improved Snowball as follows: $\frac{1}{4}$ oz. 75 cts., 1 oz. \$2.50, $\frac{1}{4}$ lb. \$8.00.

Celery, New Golden Rose-ribbed, a self-blanching, beautiful, quick-growing, tender and crisp variety of superior flavor. The finest kind for either home or market. 1 lb. \$2.75, $\frac{1}{4}$ lb. 90 cts., 1 oz. 25 cts., $\frac{1}{2}$ oz. 15 cts. Other sorts: Pascal, White Plume and Pink Plume; 1 lb. \$1.50, $\frac{1}{4}$ lb. 50 cts., oz. 25 cts., $\frac{1}{2}$ oz. 15 cts.

Cucumber, Improved Early White Spine, one of the best varieties for slicing or pickling; 1 lb. \$1.30, $\frac{1}{4}$ lb. 50 cts., 1 oz. 15 cts. Improved Long Green; same price.

Special Bargain.—For 30 cents I will send the 31 varieties above described (31 pkts), or two collections (62 pkts) for 50 cents, to two different addresses, if desired.

GEO. W. PARK, LaPark, Lancaster Co., Pa.

Corn, Sweet, New Early Giant, has the qualities of a first-class variety. It is white, very sweet and tender, and keeps in a usable state for a long time. 1 quart 45 cts., 1 pint 25 cts., $\frac{1}{2}$ pint 13 cts., 3 pkts 12 cts., 1 pkt (2 ozs.) 5 cts. Also at same price: Early Corry, Country Gentleman, Improved Sugar, Egyptian Sweet.

Kohl Rabi, Early White Vienna, an excellent vegetable of easy culture. Good for table use and feeding stock. $\frac{1}{4}$ lb. 50 cts., 1 oz. 15 cts.

Leek, Large American Flag, a vegetable similar to the Onion in flavor, and requires similar treatment. Produces thick stems of sweet flavor when properly blanched. 1b. 85 cts. $\frac{1}{4}$ lb. 25 cts., 1 oz. 8 cts.

Lettuce, New York, best all-round Lettuce, immense heads, crisp, tender and free from bitterness. $\frac{1}{4}$ lb. 20 cts., oz. 8 cts. Others, same price: Improved Hanson, Big Boston, Salamander and Trianon.

Muskmelon, Rocky Ford, first-class, medium-sized fruit of good quality; fleshy, sweet and of exquisite flavor. $\frac{1}{4}$ lb. 25 cts., oz. 8 cts. Emerald Gem, Tip Top, Hackensack, Acme and Jenny Lind at same price.

Watermelon, Early Sweet, splendid, early and sweet; grows where others fail. $\frac{1}{4}$ lb. 20 cts., oz. 8 cts. Others, same price: Dixie, Phinney's Early, Fordhook, Kolb's Gem, Mountain Sweet.

Okra, Early Dwarf Prolific, compact, early, grows readily and bears freely; fine for soups, stews and pickles. $\frac{1}{4}$ lb. 15 cts., oz. 5 cts.

Onion, Australian Brown, solid, tender and sweet; none keep better, none more desirable: $\frac{1}{4}$ lb. 20 cts., oz. 8 cts. Other varieties: Early Red Wethersfield, Extra Early Red, Yellow Danvers, Red Globe, Yellow Globe and Silver Skin, $\frac{1}{4}$ lb. 50 cts., oz. 15 cts.

Parsley, Champion, very productive; fine for seasoning soups and meats. $\frac{1}{4}$ lb. 25 cts., oz. 6 cts.

Parsnip, Improved Guernsey, best variety, flesh fine-grained, tender and delicious; $\frac{1}{4}$ lb. 10 cts., oz. 5 cts.

Pepper, New Columbus, enormous, bell-shaped fruit, mild, sweet, various colors; fine for stuffing. $\frac{1}{4}$ lb. 75c., oz. 25c. Others: Long Red, Cayenne, Cherry, etc.

Pea, Champion of England; one of the best, producing great pods of finely flavored Peas in great abundance; quart 35 cts., pint 18 cts. Others, same price: Philadelphia Extra Early, First and Best, Everbearing, Heroine, Large Marrowfat and Alaska.

Radish, New Cardinal White-tip, earliest known variety and one of the best; fine market sort; $\frac{1}{4}$ lb. 15 cts., oz. 5 cts. Other sorts at same price: French Breakfast, White Turnip, Long Scarlet, Cincinnati Market, Early Deep Scarlet, White-tip Scarlet Ball, Chinese Rose Winter, Chartier, Golden Globe, White Vienna, Scarlet China Winter, Strasburg etc.

Squashes, in variety; Early White Bush Scallop, Giant Summer Crookneck, Delicata, Mammoth Chilli and Hubbard, 1 oz. 10 cts.

Tomato, The Faultless Stone; finest and most profitable variety; fruit large, rich in color, ripens evenly. $\frac{1}{4}$ lb. 65 cts., oz. 25 cts., $\frac{1}{2}$ oz. 15 cts. Also Livingston's Beauty, Ignotum, Golden Queen, Trophy, Ponderosa, Livingston's Favorite, Ten Ton and Atlantic Prize.

Spinach, Long-standing, Prickly-seeded; best garden sort; 1b. 35 cts., $\frac{1}{4}$ lb. 12 cts.

Turnip, Purple-top White Globe, the best; 1b. 50c., $\frac{1}{4}$ lb. 15c., oz. 5c. At same price: Purple-top Strap-leaf, Amber Globe, White Stone, Early Flat Dutch, Early Flat Purple-top, Extra White Milan, Robertson's Golden Ball, Early Six Weeks, Scarlet Kashmyr.

Lavender, True, medical herb, $\frac{1}{4}$ lb. 50c., 1 oz. 20c.

Seeds promptly mailed, postpaid, at prices quoted.

Asparagus Plumosus

This is equally as beautiful, and even more delicate than Asparagus Sprengeri. The sprays of foliage are lace-like, rich dark green, and exquisitely delicate and handsome. The plants grow upright, and are charming for pots. They should be repotted as they grow, and they become more beautiful with age. The sprays are lovely for cutting. **Fine plants 15 cents each, 4 for 50 cents, mailed.**

Special Offer.—I will mail, this month, one Asparagus Plumus, one Asparagus Sprengeri and one Asparagus plumosus nanus, all fine plants, for only 50 cents. Order now. **GEO. W. PARK, La Park, Pa.**

LOUIS, MO.**

Darken Your Gray Hair

DUBY'S OZARK HERBS restore gray, streaked or faded hair to its natural color, beauty and softness. Prevents the hair from falling out, promotes its growth, cures and prevents dandruff, and gives the hair a soft, glossy and healthy appearance. **IT WILL NOT STAIN THE SCALP,** is not sticky or dirty, contains no sugar of lead, nitrate silver, copperas, or poisons of any kind, but is composed of roots, herbs, barks and flowers. **PACKAGE MAKES ONE PINT.** It will

produce the most luxuriant tresses from dry, coarse and wiry hair, and bring back the color it originally was before it turned gray. Full size package sent by mail, postpaid, for 25 cents. **OZARK HERB CO., Block 9, St. Louis, Mo.**

CORRESPONDENCE.

Mr. Park:—In taking a walk one day in May, I passed through a partly cleared timber patch, and stepped right into the largest patch of *Arisæma triphyllum* I have ever seen. It must have covered half an acre at least. All were in bloom at the time. I lifted half a dozen of the plants and brought them home, planting in a situation similar to that in which they grew. They have grown nicely, and are now bearing the peculiar club-shaped seed clusters. I have often searched for them in the woods around here, but never before have I found more than single specimens. We have many beautiful wild flowers in Iowa. Along railroad tracks they are numerous, sometimes a sheet of color for miles.

Our western railroads are becoming more æsthetic in their tastes; formerly the passenger stations were ugly and dreary, surrounded by cinders; now this is changing. For an example, I take the Chicago, Rock Island and Pacific, one of our great trunk lines, which passes through this city. For forty years they had an ugly old brick station here, with a cheerless outlook of tracks and stone paved yards. Last year they built a

beautiful new, fire-proof, pressed-brick and stone station, with elegant furnishings, completing the structure in the fall. This spring they began improving the grounds, occupying an entire block, with the result that they have a most heartsome spot; one of the prettiest in this beautiful city. The grounds present an expanse of velvety green lawn, with handsome beds of foliage and flowering plants, while smooth sidewalks of concrete connect the building with the street. The three surrounding streets are paved with brick. The station is located in the midst of a residence district, four blocks from the business section. The company have received much praise for their efforts, and incoming travellers moreover receive a good impression of the town. They are doing the same in other towns, building many handsome stations. It seems to me the time is coming when our railroad companies will take as much pride in their stations and grounds as private citizens do in their homes, and I hail the day when they do.

With these words, and an expression of appreciation for the Magazine which I enjoy reading as much as ever.

Claude L. Robinson.

Johnson Co., Iowa.

HAIR-DYEING COMB.

German patent; produces any shade by simply combing, without staining the scalp; harmless, durable, undetectable. Saves time and money. Practically demonstrated at our showrooms. Write for particulars. **Dept. 98, H. Bieneck, 49 E. 134th St., New York.**

450,000 TREES

200 varieties. Also Grapes, Small Fruits etc. Best rooted stock. Genuine, cheap. 2 sample currants mailed for 10c. Desc. price list free. **LEWIS ROESCH, Fredonia, N. Y.**

A FEW CHOICE FLOWER SEEDS.

Acacia lophanta, beautiful Fern-tree; fine pot plant.
Ageratum, new large-flowered dwarf sorts, mixed.
Alonsoa, lovely, free-blooming plants for pots or beds.
Alyssum, New Carpet, mass of large white clusters.
Amaranthus, new quadricolor, superb variegation.
Antirrhinum, (Snapdragon), Giant Fragrant mxd.
Aster, Paeony-flowered Perfection Improved, incurved flower of enormous size; all sorts, special mixed.
Aster, New Victoria, splendid large flowers, very double, finely imbricated petals, all colors mixed.
Aster, New Marvel, globe-flowered, double, white with a distinct blood-red centre; a grand novelty.
Aster, Ostrich-feather, enormous flowers with twisted petals, like a Japan Chrysanthemum; all colors mxd.
Aster, Park's Silver Cloud, makes grand bed of white bloom; flowers very large and perfectly double.
Aster, Cocardeau, of many rich colors, very double, with pure white centre; mixed.
Aster, Queen of Earlies; earliest of Asters; many fine colors mixed; splendid for either pots or beds.
Aster, Chrysanthemum-flowered Dwarf, an elegant, showy, freeblooming Aster; for beds or pots; mix'd.
Aster, Harlequin, double, the colors checkered white.

GOSSIP.

Dear Floral Friends:—To say that it is a waste of money for one to spend large sums for floral decorations, for certain occasions, such as weddings and funerals, is a waste of words. Of course, there are cases in which expense along this line is carried too far. The fact is that in many instances florists in small cities would be obliged to close out their business but for these large orders; and the people who so appreciate the privilege of purchasing an inexpensive plant for themselves, or a dollar's worth of flowers for an invalid friend, do not realize that they would be unable to do so were it not because of the heavy purchases of those whose apparent extravagance they criticize. The large orders which people of wealth, singly or collectively, expend for floral decorations for some celebration, or as a tribute to one deceased, are the direct means of giving elevating employment to many. Those who work in flower establishments are removed from many temptations which come to those in other callings. Doubtless hundreds of young men have been saved from ruin by giving up positions in the cities and going into the suburbs to work for nursery men. Now in floriculture as in everything else, the best charity that one can render another in need of assistance is work.

By the way, every tree, every shrub, every plant, every blossom is a missionary, blessing each beholder.

Alice May Douglas.

Sagadahoc Co., Me., Dec. 28, 1903.

Dear Floral Friends:—While I now make my initial bow to you, Park's Floral Magazine and myself are not strangers. I have taken it for many years, and am now on the list as a five-year subscriber. Did any of you ever feel that you had lost something very valuable out of your life, by not having done some particular thing? Well, that is the way I often feel, because I did not commence the growing of flowers sooner. During the earlier years of my life, circumstances compelled me to devote both my time and means to other things. Now as I am well along in years, and my labors and cares are fewer, I can only feel sorry that I have missed the pleasures the flowers would have given me. While my failures have been quite as numerous as my successes, still I have no reason to feel discouraged, and have some things to feel proud of.

Mariah E. Foreman.

McLean Co., Ill., Nov. 24, 1903.

Dear Floral Friends:—How many of you have a bulb bed, I wonder? I don't mean bulbs scattered all over the yard, I mean one bed given up exclusively to them. I think without any exception such a bed is the most satisfactory, as, by a judicious choice of bulbs one can have blooms from the time the snow is off, until frost catches them. I have always had a small bulb bed, and enlarge it each year, as I can afford it. Even though one has only spring-blooming bulbs, seeds of any annual can be scattered over the bed while the bulbs are yet in bloom, and it can thus be kept aglow with color all the summer without disturbing the bulbs. Two or three dollars invested in Tulips, Hyacinths, or hardy Lilies, planted as they should be, will insure you blooms for a life time.

Phoebe.

Herkimer Co., N. Y., Nov. 1, 1903.

Mr. Park:—Your Magazine has been a wonderful help to me, as it is sure to give just the desired information. I have taken it for three years now, and would not like to give it up, as there is always something to be learned from it.

MAGAZINE APPRECIATED.

Mr. Park:—I have taken your Magazine for sometime, and I like it very well. It is a great help to all who love flowers. I find a great deal of useful information in it.

Northampton Co., Pa.

Mr. Park:—Your Magazine is a very welcome visitor every month. I don't know how we could grow flowers without it. There is so much good advice in it that we cannot help but be successful flower growers.

MRS. EMMA B. FRENCH.

Many readers will be made sad when they learn of the death of Mrs. Emma B. French, who, for many years, was a reader and an esteemed contributor of the Magazine. Her death occurred at her home in Parkplace, Oregon, July 2nd, 1903. Her husband, two sons and two daughters are left, and these have the earnest sympathy and heartfelt good wishes of the Magazine friends in their great sorrow. When on her death bed she composed the following touching poem, addressed to her husband:

THE DYING PROMISE.

You wonder as you sit to-night
Your hand close clasped in mine,
And try to pierce the veil between
Eternity and time;
And strive with eager gaze to scan
The stream I soon must cross,
And try 'e'en now to realize
The burden of your loss.

You wonder, love, how long 'twill be
That you must longing stand
With empty arms and aching heart,
Before, at God's command,
You're summoned to the further side
To join the angel band,
To know once more the thrilling joy
Of clasping, clinging hands.

You have a work before you yet,
A noble work, my own,
Or else our Father would not make
Your path so drear and lone.
He has some purpose high and true,
A calling pure and bright;
He has some work for you to do
And then will come the night.

Then work with willing hand and heart,
Make right and truth your aim,
And listen while I tell you, love,
When we shall meet again.
Ah! clasp me closer, closer love,
Within your sheltering arms;
How true and strong they have always been
To shelter me from harm.

And ere I tell you, let me ask
One blessed promise, love;
Let these dear arms be empty
Till we meet again above.
I know it will be lone, but ah!
I could not bear to die
And know another claimed the place
Where 'tis my Heaven to lie.

Be pure and noble, strong and true,
And when your work is done
You'll lay at blessed Jesus' feet
The laurels you have won,
And wait with patience by the stream
Where I have crossed before,
Waiting the boatman still and pale,
The silent muffled oar.

Dreading its shrouded mystery
Beyond your sight and breath,
The darkness that no light can pierce,
The silent stream of death.
Trying to look beyond the tide,
Trying in vain to see,
Stretching your arms with aching heart—
Across—to Heaven and me.

ASTHMA

Cured to stay Cured. Health restored
Book 20 FREE, P. Harold Hayes, Buffalo, N. Y.

And when the boatman stern is come,
Your sight grows weak and dim;
You'll try to look across to me—
You'll look away from him—
Until a sudden touch shall thrill
Your inmost being through.
Your eyes flash forth a newborn light;
A well known form you view.

And you shall clasp with eager arms
The form you thought to dread,
And kiss once more the cherished bride
You mourned so long as dead;
For God is merciful, my love,
And I shall come to meet
The one true love that I have yearned
E'en while in Heaven to greet.

And then the stream so dark and deep
Will gleam with sudden light,
And we shall cross together, dear,
To shores of love and light;
And friends that 'round you stand and weep
Your sudden smile shall note,
And say "He's crossed the stream in peace,"
Nor dream who rowed the boat.

Emma B. French.

CHILDREN'S CORNER.

Dear Mr. Park:—Mamma takes your Magazine, and we all enjoy reading it. I visit my grandparents in Ohio nearly every summer. My grandpa lives in the country, and keeps many animals. I have four brothers and two sisters. I like flowers very much, and am going to have a flower garden all of my own. I go to a public school and am in the sixth grade.

Paula Friedemann.

Wayne Co., Mich., Apr. 10, 1903.

Dear Mr. Park:—I am a little girl eight years old. I live in a log shanty in the woods. I have a pet cat and ten dolls. It is a big family. I was out in the woods, and I found some Jack-in-the-Pulpits. My favorite flowers are Roses, Asters, Pansies and Forget-me-nots.

Dagney Deborah Westem.

Holt Co., Wis., June 5, 1903.

Mr. Park:—I like your Magazine very much. I like the Children's Corner. I am eleven years old. I got a lovely doll for Christmas. It is dressed in a blue suit. My mamma had over seventy shades of Pansies, fifty feet of Dahlias, and the same of Sweet Peas. Her flowers went into more than forty homes.

Jefferson Co., Pa., Apr. 8, 1903.

Dear Mr. Park:—I am a little girl nine years old, and live in the country. I have a brother named Alva, and a sister named Myrtle. My papa has fourteen horses. My mamma gets your vegetable seeds, and they are fine. Myrtle gets your flower seeds, and they grow nicely.

Don't Neglect Rheumatism

**New Appliance for Drawing Acid
Poisons From the System
through the Pores of the
Feet Sent to Anybody**

FREE---On Approval---Try It!

Don't neglect rheumatism. The acid poisons accumulate day by day until joints become solidified in horribly distorted shapes and relief from the indescribable suffering is beyond the power of man to give.

Heed the warning pains of rheumatism and rid your system of the cause while you can by wearing Magic Foot Drafts. Don't take harmful medicine. The Drafts draw out the acid poisons through the great pores of the feet, where the capillary and nerve systems are most susceptible, reaching and curing rheumatism in every part of the body.

If you have rheumatism send your name to-day to the Magic Foot Draft Co., 491 Oliver Bldg., Jackson, Mich. You will get by return mail a pair of the celebrated Magic Foot Drafts, which have made a record of curing nine out of ten cases in Jackson, where the discoverer lives, and have already become a household remedy all over the world. No other remedy ever cured so many cases considered incurable. That is why the makers can send them on approval. You risk nothing. If you are satisfied with the benefit received, send one dollar. If not, send nothing. A fine booklet in colors and many testimonials comes free with the Drafts. Better not delay. Write to-day.

WHAT FLOWER IS THIS?

A T C H

The beautiful and fragrant spring flower represented by the accompanying letters will be blooming in the gardens in many sections of the country this month. Although the first two syllables of the name are indicated by a high A, the bulbs mostly come from the low Dutch land—sections so low that the drainage water has to be pumped up from the drainage ducts and sent to the sea in elevated canals, the canals open for outflow, during low tide, and closed to prevent ingress and overflow during high tide. The flower is one of our showiest and sweetest spring flowers for beds and borders, and is also used for winter flowers when grown in pots and glasses. What is it?

CHILDREN'S CORNER.

Dear Mr. Park:—I am a little girl 13 years old, go to school, and am in the seventh grade. I am a lover of flowers. We have two or three beds of Pinks, and they bloom the whole year round. They stay in the ground in the winter and come up again in the spring as nice as ever. Mamma has been taking your Magazine for three or four years. She likes it very much. What I like most is to read the letters in the Children's Corner.

Mary Shannon.

Wyandotte Co., Kan., Sept. 3, 1903.

Dear Mr. Park:—I am a little girl ten years old. I go to school every day. My teacher's name is Miss Mamie Larson. I play the organ. I am very fond of flowers. Mamma has taken your Magazine for three years. I like it very much. My pets are a cat and a dog. My dog's name is Shep. My cat's name is Topsy. I also have a pet hen named Spotty and a calf named Cherry. My favorite flowers are Roses, Pansies and Daisies.

Stella Brown.

Churchill Co., Nev., Jan. 19, 1904.

Dear Mr. Park:—I am a little girl eight years old. I go to school. My papa is dead. My mamma and grandma and the children live alone, except a man who works for us. He is a very good man. My mamma takes your Magazine, and likes it very much. My little brother's name is John. We had a flower garden last summer. The flowers were very pretty. I love to read the Children's Corner.

Mary Lee Parson.

Warren Co., Ill.

Dear Mr. Park:—I take your Magazine and like it very well. The flowers I got from you last summer grew nicely, and were very pretty. I am thirteen years old. I love flowers and feel as though I could live among them. Mamma keeps lots of plants. We have some that are blooming. Mamma and I each take your Magazine. I always read the Children's Corner, and enjoy it.

Washington Co., Ia. Mattie Belle Shaw.

WANTED.--To rent during the early spring and summer a Green House or Green Houses, covering in the aggregate about one acre of ground, within about 100 miles of New York, for the experimental cultivation of cotton on a large scale. SPLIT
HICKORY
SPECIAL

SPLIT HICKORY SPECIAL TOP BUGGY

This is a strictly high quality buggy at a very low price. There is nothing cheap about the buggy. \$75 is the very least its equal would be sold for by any dealer, and you will see that it is well worth that price when yours arrives. We propose this year to **Make to Your Order** one of our Split Hickory Special Top Buggies, send it to you promptly, accompanied by our Iron Clad Two-Year **GUARANTEE. Try It Thirty Days Free**

The price to you is but \$50, the cheapest price at which a buggy of this quality was ever sold. It leads them all in finish, style, quality and durability. If you do not agree with us that it is the biggest buggy bargain you ever saw and well worth \$75, you are not obliged to keep it. Our free trial plan protects you. We do not ask you to take our word for anything, but you get the buggy on trial, hitch up to it, use it as you would your own, and decide for yourself. We carry on hand a large quantity of these buggies in rubbing varnish ready for finish, which permits our making any reasonable changes in the finish or construction and shipping without unnecessary delay.

Here are a few of the **100 POINTS OF MERIT**. Longitudinal Center Spring, which prevents backward and forward motion, strengthens the gear and braces the body. Screwed rim wheels, hot set, $\frac{1}{4}$ inch round edge steel tires, oil tempered springs, long distance axles, cemented axle beds, two extra clips on axles more than are furnished on other buggies, choice of wooden spring bar or Bailey body loop, 16oz. imported all wool broadcloth upholstery, open bottom spring cushion, solid panel springs back, water-proof top with genuine No. 1 enameled leather quarters and back stays, 28 oz. rubber roof and back curtain, back curtain lined and reinforced, oil and lead system of painting, 16 coats, all wood work carried 100 days in pure oil and lead, padded patent leather dash 13 inches high (2 inches higher than ordinary) full length velvet carpet, toe carpet, panel carpets, board boot on back of body, lined seat ends, rubber side curtains, quick shifting shaft couplings, double braced shafts with heel and corner braces, 36 inch point leathers, round leathers on single tree, line holder on dash, patent trace holder on single tree.

There are many other special points of merit too numerous to mention here. Our 186-Page Catalogue which is **FREE** tells you all about this buggy and all of our other Split Hickory Styles. Remember you can not get Split Hickory Vehicles from anyone else as we do not sell to dealers or agents, but our entire output is sold direct to consumer at wholesale rock bottom prices. The readers of this paper are customers of ours and they know and the Editor knows that we are in every way perfectly responsible and will do just as we say we will. Write for our Catalog today. It will save you money. Note—We manufacture a full line of high grade Harness, sold direct to the user, at wholesale prices.

A WIFE'S MESSAGE

Cured Her Husband of Drinking.

Write Her Today and She Will Gladly Tell You How She Did It.

My husband was a hard drinker for over 20 years and had tried in every way to stop but could not do so. I at last cured him by a simple home remedy which any one can give secretly. I want every one who has drunkenness in their homes to know of this and if they are sincere in their desire to cure this disease and will write to me, I will tell them just what the remedy is. My address is Mrs. Margaret Anderson, Box 454 Hillburn, N. Y. I am sincere in this offer. I have sent this valuable information to thousands and will gladly send it to you if you will but write me to-day. As I have nothing whatever to sell I want no money.

SEND FOR FREE LIST OF RECORDS & TALKING MACHINES.

has never been given free for selling \$3.60 worth of goods as some want you to believe, but if you send us your name and address, we will send you postpaid, and Trust You with 36 of the handsomest and fastest selling articles ever made; easily sold in half

an hour at 10c. each. When sold send the money, \$3.60, and we will send you a guaranteed A. & C. Columbia Graphophone with three-song record. In case you are not pleased with the Graphophone, send it back to us and we will allow you \$3.50 on the purchase of any machine you may select from our catalogue. We will forfeit \$1,000 to any one proving any trick or catch about this offer, or that we give a toy machine or one that must be turned by hand. Our machine is a key winding, self-playing Columbia Graphophone, and with three-song record, is the greatest premium ever offered. Send for free list of records and graphophones. CORRESPONDENCE.

My Dear Mr. Park :—A good and obedient husband will do as his wife wants him to do, providing he understands her, or what she expects him to do, for that makes all the difference known to him. I don't know that I am an exception, for there are lots of good husbands that are yet in the shade. However, I think that I am a pretty good husband for I am always ready and willing to please my wife in all of her numerous wants that come daily the year round; for while it is a satisfaction to me, it keeps her good natured and sunny and then everything runs as smooth as oil; but I am feeling "kinder heart broken" as I write. The other day my wife and I were talking about plants and flowers, and how nice they made everything smell, and that she would like a couple of potted plants to add to the already large collection, and asked me to get them for her. Then I tried to explain to her that I did not know any more about plants than an elephant, only that I liked to see them around. Well, said my wife, I will trust to your good judgment to make the selection, so now my dear you go to the florist and bring me home a couple of rare plants. That settled it. I went and like a good and faithful husband was soon tugging into the house two potted plants of Nasturtiums one under each arm which I proudly placed on the table. These are your rare plants with rare perfumery. She looked at the plants and then at me. "Well, I admire your judgment! Do you call those rare plants? Now you just take those nasty things right out of here! I won't have them in the house." Well, I just took those rare plants and marched out into the orchard and dug a hole under a golden russet apple tree and buried them. If they ever come to the surface I will cremate them. I shall never make any more selections of rare plants for my wife. A woman thinks that a man knows everything, but they don't, especially about rare plants. William Crane.

Norfolk Co., Mass., Aug. 3, 1903.

Dear Friends:—By putting cold tea or coffee on Geraniums, the blossoms are much brighter, and more profuse.

STARK TREES best by Test—78 YEARS. We WANT MORE SALESMEN **PAY CASH** Weekly Stark Nursery, Louisiana, Mo.; Danville, N. Y.

A Huge and Glorious Bedding Plant

PARK'S STAR FLOWER.

Price, 4 packets 10 cts, 1 packet 3 cts.

Here is a giant blooming plant from the Argentine, semi-tropical in appearance and displaying throughout the season a mass of graceful, creamy white, deliciously-scented flowers. It is a species of *Nicotiana*, commonly known as Star Flower, because of its star-like form. The plants are easily grown from seeds, begin to bloom when young and small, and increase in size and beauty each day as the season advances until after severe frosts. Some persons report success with it for winter blooming, growing in pots and shifting till they occupy eight-inch pots. It is for beds, however, the plants are specially recommended. They grow from six to ten feet high, exhibiting enormous leaves and glorious branching stalks, every branch bearing a magnificent panicle of flowers which are open day and night, attracting the attention and admiration of all who pass, and making the garden air redolent with their delicious perfume. If kept from forming seeds the flowers are borne freely and continuously the entire season. Those who have grown this grand novelty speak of it in the highest words of praise, as the following sample letter will attest:

Mr. Park:—I bedded out a plant of Park's Star Flower in April, and it soon became a beautiful tree, branching within two feet of the ground, and showing a mass of fragrant, white flowers. As the seeds began to ripen I cut the branches back, and in a little while new shoots appeared, and the plant was white with bloom. Again I cut it back and again it grew and bloomed. To-day, November 27th, it is in full bloom, although we have had three frosts and two snows. It is simply a magnificent and most satisfactory plant.—E. L. Arbuy, Texas Co., Mo.

Park's New Giant Striped Maize.

Price, 4 packets 10 cts., 1 packet 3 cts.

A grand novelty among foliage plants is Park's New Giant Striped Maize. The plants grow as readily as field corn, attaining the height of from seven to twelve feet, the leaves gracefully arched and gorgeously striped green, white, rose and gold. In autumn the stalks are surmounted by large plummy tassels. A group of this splendid foliage plant upon the lawn is exceedingly beautiful and attractive, and never fails to elicit the admiration of all who see it. I could fill pages of this Magazine with enthusiastic letters, but have room only for the following:

Mr. Park:—I wish to speak for Park's Giant Striped Maize. The foliage is more than handsome—red, green, white and gold stripes in different widths running the length of the leaves, and some leaves nearly all white. Your Maize is a beauty, indeed. My husband thought it the prettiest thing in the yard.—Mrs. Wm. H. Fisher, Potter Co., Pa.

Mr. Park:—The Giant Maize was lovely until the frost came. It measured 12 feet 4 inches high. I shall try it another season.—Mrs. M. Gillett, Defiance Co., O., Oct. 20, 1903.

Mr. Park:—Your Giant Striped Maize was glorious—so tall and stately that everyone who saw it admired it. I planted the seeds May 10th. One stalk grew 13 feet 8 inches high, and the other 13 feet 10 inches high.—Mrs. S. A. Diehl, Stark Co., Ohio.

Special Offer Park's Floral Magazine, Monthly, 1 Year, **Only**
1 Packet of Seeds of Park's Star Flower, **15 Cts.**
1 Packet of Park's Giant Striped Maize,

If you want something your friends do not have, something that will make showy and attractive groups, plant seeds of these two grand novelties. You will never regret the small outlay, and the Magazine you will find of more value to you than the trifling sum asked for all. These novelties are of the easiest culture, and cannot but prove a source of wonder and admiration to yourself and friends. Sent postpaid to any address at above prices. Order at once.

GEO. W. PARK, LaPark, Pa.

Sure Cure for Cancer

Scrofula, Running Sores and all Blood Diseases.

A never failing cure luckily discovered by an old Michigan Doctor.

Forty-five years ago my father who was himself a doctor, had a vicious cancer that was eating away his life. The best physicians in America could do nothing for him. After nine long years of awful suffering, and after the cancer had totally eaten away his nose and portions of his face (as shown in his picture here given) his palate was entirely destroyed together with portions of his throat.

Father fortunately discovered the great remedy which cured him. This was forty years ago, and he has never suffered a day since.

This same discovery has now cured thousands who were threatened with operation and death. And to prove that this is the truth we will give their sworn statement if you will write us. Doctors, Lawyers, Mechanics, Ministers, Laboring Men, Bankers and all classes recommend this glorious life-saving discovery, and we want the whole world to benefit by it.

HAVE YOU GOT CANCER.

Tumors, Ulcers, Abscesses, Fever-Sores, Gout, Catarrh, Salt-Rheum, Rheumatism, Piles, Eczema, Scald Head or Scrofula in any form.

We positively guarantee our great treatment, perfect satisfaction and honest service—or money refunded.

It will cost you nothing to learn the truth about this wonderful home treatment without the knife or caustic. And if you know anyone who is afflicted with any disease above mentioned, you can do them a Christian act of kindness by sending us their addresses so we can write them how easily they can be cured in their own home. This is no idle talk, we mean just what we say. We have cured others and can cure you. Forty years experience guarantees success. Write us today; delay is dangerous. Illustrated Booklet FREE.

DRS. MIXER, 286 State St., HASTINGS, MICH.

CURES FITS

Asks No Money Before Proving.

Dr. Charles Green, the renowned Brain and Nerve Specialist, has found a positive cure for this terrible disease. So sure is he that he can cure any case of Epilepsy, or Fits, no matter of how long standing, or how many treatments have failed, that he will send free, a full two weeks' treatment to any who wishes to give it a test. If you suffer from Epilepsy write for this trial treatment and begin at once before some fatal accident befalls you while in a fit. It has cured thousands where all else had failed, and it will cure you. Address Dr. Charles W. Green, 51 Monroe Street, Battle Creek, Michigan.

GOV'T AUCTION SALE CATALOG Guns, Pistols, Military Goods (Illustrated), 15c., mailed 6c. stamps. F. Bannerman, 579 Broadway, N. Y.

CORRESPONDENCE.

Dear Mr. Park:—While it seems strange that it is no longer Libonia, Franklin Co., Pa., it is with pleasure that your thousands of subscribers and friends send greeting in your beautiful new home, and we most heartily wish you long life and prosperity. May your subscription list be multiplied, and the influence of your little Magazine be manifold, for "none know it but to love it, none name it but to praise." Though hundreds of miles lie between us, there is between all flower lovers a bond of union, and it may be that in the hereafter, "We shall know each other better when the mists have rolled away." Last year I had a vegetable garden of my own. It was planted with Park's seeds, and such a garden! We had plenty of rain and here in this black prairie soil plants grow to perfection. The 'new Valentine Wax Beans were a revelation. The Tomato vines grew way above my head. We had Tomatoes fresh from the vines on Thanksgiving Day, also Radishes. Giant Pascal Celery was fine. Those pole Beans "Old Homestead," were the finest snap pole Beans I ever tasted. Some of the pods were over a foot long, and contained from ten to twelve Beans.

The Cannas and Dahlias which I raised from your seeds last spring were beautiful. There came a cold rain before I got the roots up, and not getting them properly dried I regret to say they all decayed, so I will have to start over again this spring.

My hardy Pinks are coming up nicely. Pansies are now in bloom.

There came through the mail, a short time ago, a box from far away New England, and in it I found Wintergreen with its bright, red berries, and best of all the fragrant, trailing Arbutus, the Mayflower of the Pilgrims. How I love the tiny, fragrant blossoms, which so vividly call to mind my childhood home, and the winding path up the hill, across the pasture, through the swamp, to the forest, where the fragrant flowers bloomed. That path once worn by the tramp of many little feet is scarcely discernible now, and the tiny twigs that intercepted our path are now grown to trees. Still it lives in memory as but yesterday.

Mrs. Thompson.

Champaign Co., Ill., Apr. 13, 1903.

QUESTIONS.

Sweet Mary.—What is the Sweet Mary, and where can plants of it be obtained?—M. G. Adams Co., Iowa.

Amaryllis.—I have an Amaryllis Johnsonii, two years old, that has never bloomed. How shall I treat it to get it to bloom?—Mrs. L. B. Taney Co., Mo.

RETURN OF SPRING.

Under the snow and frozen ground,
Crocuses are sleeping, sleeping sound.
Tulips are waiting to greet us again,
When spring brings back the Robin and Wren.
The Violets, sleeping beneath the snow,
Will be right glad in spring to know
That we have been watching with eager eyes
For the first blue Violets and butterflies.

The streamlets and brooks that are now frozen over,
Will flow once again 'midst red and white Clover;
The trees which are now dressed in garments of gray,
Will put on their green dresses so bright and so gay.
The robins who now are awaiting the spring,
Will soon come back, their sweet songs to sing;
And bees that now are asleep in the hives,
Will go to their work when the springtime arrives.

Under the trees in the woodland near by,
The Ferns in their peaceful sleep do lie;
And soon as the snow and the cold winds depart
Each Fern will begin growth with a willing heart,
So let us all welcome the oncoming spring,
With the flowers and the birds that to us it does bring.

And do not think that the flowers are dead,
But that each is asleep in his own little bed.
Knox Co., Ind., Henry W. Hall, Age 12.

CORRESPONDENCE.

Dear Mr. Park:—Here I am away down in the southern part of Florida, five miles south of Miami. I am so glad I have come, even if it is in mid-summer, for if there is a paradise in the United States, it is here on the east coast, and past the frost line. I am here for good! I grew so tired of cold, and wanted to go where I could live outdoors, and grow flowers every day in the year. I have been very busy looking up a grove and a little home, and have found both. The home is a simple one, with handsome flowers and vines growing everywhere. The yellow Allamanda (Hendersoni, I think), is an immense vine, climbing over gate posts and up the corners of houses, just loaded with its big yellow bells at least four inches across. Crepe Myrtles grow in large trees—some thirty feet high; and Oleanders of all shades but yellow, are young trees, too. I have seen them in the deepest crimson, five or six shades of pink; from a deep pink to a beautiful blush. Along the sides of walks I see so many wild Milkweeds, not the pretty yellow one you have in Pennsylvania (Asclepias tuberosa), but a deeper, more reddish yellow, and the individual flowers are much larger; and there is one whose sepals are a rich crimson. Is there some Sister who has a copy of "Chapman's Southern Flora" to exchange with me for something else? I know I will not find many of our Florida flowers in my Dr. Gray's Field Book.

Mrs. R. S. Trusslow.

Dade Co., Fla., Aug. 5, 1903.

FROST FLOWERS.

Dainty Frost-flowers with feathery spurs,
You bring back sweet memories of happier days.
Flower Lover.

Marion Co., Ills., Aug. 19, 1903.

I Cure Women

OF FEMALE DISEASES AND PILES

I Will Cure You So That You Will Stay Cured—Women No Longer Need Submit to Embarrassing Examinations and Big Doctor Bills.

To Show Good Faith and to Prove to You That I Can Cure You I Will Send Free a Package of My Remedy to Every Sufferer.

I hold the secret of a discovery which has never failed to cure women of piles or female weakness. Falling of the womb, painful menstrual periods, leucorrhoea, granulation, ulceration, etc., are very readily cured by my treatment.

I now offer this priceless secret to the women of America, knowing that it will always effect a cure, no matter how long you have suffered or how many doctors have failed.

I do not ask any sufferer to take my unsupported word for this, although it is true as gospel. If you will send me your name and address, I will send you a trial package absolutely free, which will show you that you can be cured. The free trial packages alone often are enough to cure.

Just sit down and write me for it today.

Mrs. Cora B. Miller, Box No. 50, Kokomo, Ind.

DRUNKARDS

CURED SECRETLY.
Box Sent FREE.

Any woman can cure her husband, son or brother of liquor drinking, by secretly placing this remedy in his coffee, tea or food without his knowledge. It is entirely odorless and tasteless. Any good and faithful woman can wipe out this fearful evil and permanently stop the craving for liquor, as did Mrs. K. L. Townsend, of Selma, La. For years she prayed to her husband to quit drinking, but found that he could not do so of his own free will, and learning of this remarkable cure, she determined to try it. Mrs. Townsend says that before she gave

her husband half a box of Milo Tablets, he lost all desire for beer or whisky; the sight or odor of them now makes him deathly sick. Mrs. Townsend's word of gratitude is only one of the thousands in possession of this company. Anyone who will send their name & address & 4 cents to cover postage to the Milo Drug Co., 38 Milo Building, St. Louis, Mo., will receive by mail, sealed in plain wrapper, a free package of this wonderful remedy and full instructions how to cure this drink habit. It costs nothing to try it.

PILES

Instant relief, final cure in a few days and never returns; no purge, no salve, no suppository. Remedy mailed free. Address C. J. MASON, Box 59, New York, N. Y.

Mr. Park:—I have been getting your Magazine since 1895, and find it very helpful. I have the volumes bound each year, and have read and re-read them till I have them almost by heart. They are indeed a treasure to anyone who loves and cultivates flowers. **Mrs. L. B. Tancy Co., Mo., Feb. 26, 1903.**

The Noted Cancer Specialist.

Dr. Mizer of Hastings, Mich., the noted cancer specialist, is accomplishing wonderful results in curing cancer, cancerous growths and scrofula with his famous remedies. We advise all our readers who are victims of these dread diseases to write him at once, as the doctor gives each case his personal attention, and from the grateful letters received from the many sufferers who have been cured, we believe that there is at least one physician who has discovered a remedy for this awful trouble. Be sure and read his advertisement on page 26 of this paper.

HAPPY THOUGHTS.

As I bring my work to my window,
And am sitting alone here to-day,
My thoughts go wandering and roving,
They are as pleasant as flowers in May;
Right here in a snug little corner,
By my side, the Hyacinths peep,
And the Rose and Heliotrope mingle
Their fragrance so balmy and sweet.

With my flowers in bloom all around me,
And my bird singing over my head,
I can hardly realize 'tis snowing,
And the flowers out-doors are dead;
Ah, no, not dead, but sleeping
In their snug little beds of repose!
With the balmy sweet breath of the springtime
Again into life they'll unclose.

Let me pause a moment in wonder,
While my thoughts wander away
To the valleys and hills and the wildwood,
Where the ferns and the Violets stray;
And I dearly love each tiny blossom,
No matter where they may grow—
In the window, the garden, or valley,
Or their heads peeping out of the snow.

Once more when the sweet breath of springtime
Comes stealing o'er valley and plain,
And the soft, gentle rain-drops are falling,
Our hearts will be joyous again.
When the Snowdrop, the Crocus and Violet,
Peep up and nod in the breeze,
And the buds swell out on the Lilacs,
And the leaves burst forth from the trees,

Then fond memory comes stealing upon me
Of my childhood days long gone by,
And I see in fond memory a garden,
Which is pleasing and dear to my eye;
And again the sweet face of my mother,
Who went to sleep long ago,
Seems as plain to me as those flowers
That once in her garden did grow.

Oh! sweet are those thoughts which they bring
me,
Of God's tender care for his own;
He sends the sweet blossoms to cheer us,
And gathers our friends to his home.
And some day when this form is lifeless,
And they fold my cold hands o'er my breast,
Will some loving one place a blossom
In their clasp e'er I go to my rest?

Brown Co., Kan.

Mrs. Lizzie King.

Cereus.—When a Night blooming Cereus fails
to bloom it should not be repotted, or given a
larger vessel. Let it become root-bound, water
it sparingly in winter, and give it a hot, sunny
place in summer and water when necessary.

Furniture Polish and Cleaner.

Will remove stains and spots without injury to the varnish, and produces a bright and lasting polish. It leaves the surface work look like new, restoring its former brilliancy in a few minutes. Try it and see for yourself. Mailed to any address for 35 cents per bottle. Address the manufacturer,

JOS. M. BRAME,

LaPark, Lancaster Co., Pa.

BOXES Free

I discovered a positive cure for rheumatism and gout. To introduce this wonderful remedy among the suffering readers of this paper, I have set aside 50,000 boxes for free distribution and every afflicted reader is courteously invited to write for one.

Deformity of the hands in general Chronic Artericular Rheumatism.

This remedy will cure you when all others fail, besides it is absolutely safe to take and will not harm the delicate tissues of your stomach, like other rheumatism remedies do. This simple remedy has cured many persons who were so decrepit and pain-racked that they could neither clothe nor feed themselves, among them persons of 80 years and over. Recently it cured an old gentleman who had suffered 33 years and whom seven physicians had called incurable. Address

John A. Smith, 3543 Germania Bldg., Milwaukee, Wis.

AGENTS WANTED—Men and women are making hundreds of dollars and doing a world of good introducing this marvelous medicine throughout the country. Don't fail to write Mr. Smith to-day.

DR. COFFEE'S Famous Books

Mr. Fred Harper, of Springfield, Neb., says: I was growing deaf rapidly from catarrhal deafness and had given up all hope, when I commenced Dr. Coffee's Absorption Treatment, which restored my hearing perfectly.

Mike Zbornik, Ft. Atkinson, was gradually getting deaf from a severe case of catarrh nothing seemed to help. Used Dr. Coffee's Absorption Treatment for one month: can now hear as well as before.

Mr. Eli Snyder, of Altoona, Iowa, says: I am 74 years old: was afflicted with catarrhal deafness for a number of years; was gradually growing deaf. I took a severe cold recently which settled in my head, making me almost totally deaf. Used Dr. Coffee's Absorption Treatment for two months and obtained perfect hearing.

Mr. C. Schwenk, of Valley Junction, Iowa, says: I was growing deaf rapidly from catarrh and noises in the ears. I used Dr. Coffee's Absorption Treatment and obtained perfect hearing.

DR. W. OAKLEY COFFEE

DR. COFFEE has restored sight to these people and thousands of others afflicted with cataracts, granulated lids, scums, failing sight and blindness,

And Hearing to Thousands

of deaf people, many who had been deaf for years; in no instance was it necessary for these people to leave their homes. Dr. Coffee's Absorption Treatment can be used at home by anyone with good results. But one book will be sent—state whether you want book on eye diseases or deafness.

H. G. Green, of Salem, Ohio, says: I was almost blind with disease of the optic nerve and could hardly see lines on paper. Doctors could not help me. I used Dr. Coffee's Absorption Treatment; it made my sight perfect, so that I threw away my glasses. God bless Dr. Coffee.

Mrs. Lucinda Hammond, of Aurora, Neb., says: I am 76 years old and had cataracts on both eyes, which were making me blind. I used Dr. Coffee's Absorption Treatment and it restored my sight perfectly.

Mr. W. W. Jennings, of Linn Grove, Iowa, says: I was growing blind from cataracts on both eyes. I was getting too old to submit to an operation. I wrote to Dr. Coffee, used his Absorption Treatment and got perfect sight.

BABY HENDERSON

Mrs. Mat Henderson, of Rolla, N. Dak., writes: Your medicine, which I used in my baby's eyes, is simply wonderful. Doctors told me that my baby would probably be blind for life. I used your medicine in his eyes just eleven days and his sight is perfect. Words cannot praise your treatment enough or express my gratitude.

Write Dr. Coffee about your case and he will give you his professional opinion and send you his book FREE.
